## New Products

### ■ 1. Laboratory spray guns

- External controlled laboratory test guns SATAjet 3000 LAB ROB RP
- Available: As of now
- Features:
  - Nozzle system of the SATAjet 3000 B flow cup gun for use in paint laboratories
  - Can be used either with flow cup or pump
  - External fan adjustment via separate round and flat fan air control (like SATAjet ROB)
  - Usually integrated into plant systems that provide the corresponding control technology for the painting processes (painting programs)
  - Spray Gun has a scalable material flow control to reproduce the material volume flow with suction and material pressure fed paint supply (with manual volume flow metering)
  - All material-carrying parts in stainless steel, with spray pattern and test report (test report with reference paint and defined coating parameters = test and quality certificate)
  - Flow cup and flow cup adapter are not included in the scope of delivery!

Art. No.	Description
1171561	SATAjet 3000 LAB ROB B RP 1,8 laboratory spray gun, with spray pattern and test certificate
1171553	SATAjet 3000 LAB ROB RP 1.4 laboratory spray gun, with spray pattern and test certificate
1171545	SATAjet 3000 LAB ROB RP 1.2 laboratory spray gun, with spray pattern and test certificate
