Abrasives and Abrasive Accessories

We feature world-class brands such as 3M™ Cubitron™ II, Trizact™ and Scotch-Brite™ in a full abrasive range to quickly match our solutions with your repair jobs. It's all part of a complete and always expanding selection of 3M abrasive discs, abrasive sheets, cut-off wheels, belts and much more for increased efficiency at every stage of body repair.

Go for performance. Leave the dust behind.

Introducing

3M™ Cubitron™ II Net Abrasives

For Automotive Repair

Get the job done sooner with 3M™ Cubitron™ II Net Abrasives, our fastest-cutting and longest lasting net abrasive discs and sheets. This family of net abrasives delivers the exceptional cut rate and extended life of a Cubitron II abrasive, whilst letting dust extractors perform their best by leaving virtually no dust on the work surface and in the environment.

Benefits

Performance:

Faster cutting and longer lasting than leading net abrasives in the market.

Efficient:

Helps shops productivity and efficiency by helping to reduce rework and cleanup time.

Dust Extraction:

Designed to help reduce dust in the air from sanding for a cleaner workspace.

Versatile:

Compatible with pneumatic and/or electric sanders with or without dust extraction capabilities.

Construction:

Open net structure is designed to provide a virtually dust-free environment for a cleaner, healthier shop.

Features

Net construction for 95% + highly efficient dust extraction performance.

Precision Shaped Grain and engineered Ceramic mineral blend technology for faster cut and longer life.

Able to use multi-hole back-up pads and blocks for easy disc hole alignment and dust extraction.

3M™ Cubitron™ II Net Abrasives are compatible with your existing dust extraction equipment.

Center hole for easy disc alignment and storage.

CUBITRON™ II Abrasive Discs

5 Reasons to switch to 3M™ Cubitron™ II Abrasives:

1

Cuts 30% faster with less effort.

2

Lasts twice as long as conventional abrasives.

3

Runs cooler – lower chance of warping / degrading the metal.

4

Delivers a finer, more uniform finish.

5

Improves productivity to help save time and money.

3M technologies applied to 3M™ Cubitron™ II abrasives

Ce
Ceramics

3M has decades of experience creating minerals that match hardness and toughness of the mineral to the application.

Mr
Micro-replication

Microreplication allows the same mineral structure to be repeated for all 3M Precision-Shaped Grains.

Pp
Precision Processing

Precision processing deposits uniform mineral structures on the right locations, regardless of the product substrate.

Standard Operating Procedures

Recommended Net Sanding Process

PERSONAL SAFETY

• Comfort Particle Mask P3

• Hearing Protection

• Comfort Goggles

• Reusable Overall

• Safety Gloves

1 Sanding down the job area

- ▶ 3M™ Cubitron™ II Net Abrasive Disc 120+ - 150+.
- ▶ To prolong the life of the backup pad when sanding with net abrasive discs (150 mm), it is recommended that Festool Automotive Systems Protection Pad is used (PN 30089, Protection Pad PP-STF D150).
- ▶ Festool Automotive Systems electric sander ETS EC 150/5 or Festool Automotive Systems pneumatic sander LEX 3 150/5 or 150/7.

3M™ Cubitron™ II Net Abrasive Disc

Festool Protective Pad

Festool ETS EC 150/5 EQ

Festool LEX 3 150/5, Festool LEX 3 150/7

2 Fine sanding of the surface & feather edges

- ▶ 3M™ Cubitron™ II Net Abrasive Disc 220+ - 240+.
- ▶ Refine previous sanding scratches which reduces the possibility of solvents from the body filler penetrating into the OEM paint layers. If this happens it can lead to surface swelling around the repair.

3M™ Cubitron™ II Net Abrasive Disc

3M™ Dry Guide Coat

3 Sanding the body filler

- ▶ 3M™ Cubitron™ II Net Abrasive Disc 150+ - 240+.
- ▶ Initial shaping of the body filler.
- ▶ Ensure that you use dust extraction.
- ▶ Identify and highlight sanding scratches through the application of dry guide coat.

3M™ Cubitron™ II Net Abrasive Disc

3M™ Cubitron™ II Net Abrasive Sheets

3M™ Hookit™ Purple Hand Block

4 Pre-sanding of edges and borders

- ▶ 3M™ Grippy Sanding Cloth, P800 - P1000.
- Note: This product is recommended for maximum process safety.

3M™ Grippy Sanding Cloth, P800

3M™ Grippy Sanding Cloth, P1000

5 Fine sanding of the surface & feather edges

- ▶ 3M™ Cubitron™ II Net Abrasive Disc 320+.
 - ▶ It is advisable to work with a soft interface pad when sanding curved areas.
- Tip: The choice of the fine grit has to be adjusted to the solvent sensitivity of the original paint. The higher the solvent sensitivity of the original paint, the finer the sanding before primer application.

3M™ Cubitron™ II Net Abrasive Disc

Festool Interface-Pad

6 Flat sanding of the primer above the body filler area

- ▶ 3M Hookit™ Hand Block and 3M Abrasives 320+ - 400+.
- ▶ Highlight the texture and structure of the primer using dry guide coat.
- ▶ For best result and the most efficient process always use dust extraction.

3M™ Cubitron™ II Net Abrasive Sheets

3M™ Cubitron™ II 737U Abrasive Sheets

3M™ Hookit™ Purple Hand Block

3M™ Dry Guide Coat

7 Pre-sanding of edges and borders

- ▶ 3M™ Grippy Sanding Cloth, P800 - P1000.
- Note: This product is recommended for maximum process safety.
- ▶ Identify and highlight sanding scratches through the application of dry guide coat.

3M™ Grippy Sanding Cloth, P800

3M™ Grippy Sanding Cloth, P1000

8 Large area primer sanding

- ▶ Eccentric sanding with 3M Abrasives 400+ - P500.
 - ▶ For critical colours use a 3M™ Hookit™ Flexible Foam Disc P600 as a last sanding step after 400+.
 - ▶ Dedusting of the surface with 3M™ Scotch-Brite™ Abrasives Discs.
- Tip: It is advisable to work with a soft interface pad sanding curved areas.

3M™ Cubitron™ II 737U Disc

3M™ Scotch-Brite™ Abrasive Discs

Festool ETS EC 150/3

Festool LEX 3 150/3

9 Blending in to adjacent parts

- ▶ 3M™ Hookit™ Flexible Foam Disc P800 - P1000
 - ▶ Prepare adjacent areas of the OEM clearcoat.
- Note: This product is recommended for maximum process safety.

3M™ Hookit™ Flexible Foam Disc

Net Discs

Focus

3M™ Cubitron™ II Net Disc

3M™ Cubitron™ II Net Discs are fast-cutting and long-lasting family of net discs which delivers the exceptional cut rate and extended life of a Cubitron II abrasive. They're designed to help dust extractors perform their best, leaving virtually no dust on the work surface or in the environment.

Pair with a 3M recommended sanding and dust extraction system to create your shop's ideal dust capture system.

- Fast-cutting, long-lasting net discs are built with patented 3M™ Cubitron™ II precision-shaped grains.
- They help dust extractors achieve their best-possible performance – whether it is a self-generating-vacuum sander, a central vacuum system or a portable dust extractor
- The patented triangular-shaped mineral grains on the discs slice through substrates rather than gouging or “plowing” like conventional abrasive grains, helping the disc run cooler, cut faster, and last longer

3M™ Cubitron™ II Hookit™ Clean Sanding Abrasive Disc 737U

Get a superior cut and durability during key stages of automotive repair with 3M™ Cubitron™ II Hookit™ Clean Sanding Abrasive Disc 737U. Our triangular shaped grain and multi-hole pattern abrasive disc is ideal for paint removal, rough body filler shaping, fine feather-edging and final prep before blending or priming.

- Get 30% faster cutting compared to other premium abrasives
- Precision shaped, self-sharpening grains last twice as long vs. conventional industrial abrasives
- Sharper cutting surface means less pressure is required for reduced friction and wear

PERSONAL SAFETY

• Comfort Particle Mask P3

• Hearing Protection

• Comfort Goggles

• Reusable Overall

• Nitrile Gloves

Basic requirements

- ▶ Always use suitable dust extraction and select the correct tools for aluminum sanding: Festool Cleantec CTM 48 EC/B22 is certified under ATEX directive 94/9/EG for Zone 22 areas.
 - ▶ Separate tools and abrasives to avoid cross contamination.
- Note: If aluminum and steel dust are mixed together, it could create a thermal reaction, which can produce a much more powerful explosion than one with just aluminum dust.

1 Sanding down the job area

- ▶ 3M™ Hookit™ Cubitron™ II Abrasive Discs, 120+ - 150+.
 - ▶ Identify and highlight sanding scratches through the application of dry guide coat.
- Note: Aluminum is a very soft metal! Pay special attention as using excessively coarse abrasives can badly damage the surface of the substrate.

2 Fine sanding of the surface & feather edges

- ▶ 3M™ Hookit™ Cubitron™ II Abrasive Discs 220+ - 240+.
- ▶ Refine previous sanding scratches which reduces the possibility of solvents from the body filler penetrating into the OEM paint layers. If this happens it can lead to surface swelling around the repair.

3 Sanding body filler

- ▶ 3M™ Hookit™ Cubitron™ II Abrasive Discs 150+ - 240+.
 - ▶ Flat sanding of the body filler area.
 - ▶ Identify and highlight sanding scratches through the application of dry guide coat.
- Note: Excessive heat build up during the sanding process should be avoided as this can damage the aluminum substrate.

4 Pre-sanding of edges and borders

- ▶ 3M™ Hookit™ Flexible Abrasive Sheet P800-P1000.
- Note: For maximum process safety.

5 Fine sanding of the surface & feather edges

- ▶ 3M™ Hookit™ Cubitron™ II Abrasive Discs 320+
 - ▶ It is advisable to work with a soft interface pad when sanding curved areas.
- Tip: The choice of the fine grit has to be adjusted to the solvent sensitivity of the original paint. The higher the solvent sensitivity of the original paint, as finer the sanding before primer application.

6 Flat sanding of the primer above the body filler area

- ▶ 3M™ Hookit™ Hand Block and 3M Abrasives 320+ - 400+.
- ▶ Highlight the texture and structure of the primer using dry guide coat.
- ▶ For best results and the most efficient process always use dust extraction.

7 Pre-sanding of edges and borders

- ▶ 3M™ Hookit™ Flexible Abrasive Sheets P800-P1000.
 - ▶ Identify and highlight sanding scratches through the application of dry guide coat.
- Note: For maximum process safety.

8 Large Area Final Primer Sanding Before Painting

- ▶ Eccentric sanding with 3M Abrasives 400+ - P500.
 - ▶ For critical colors use a 3M™ Hookit™ Flexible Foam Disc P600 as a last sanding step after 400+.
 - ▶ Dusting of the surface with 3M™ Scotch-Brite™ Abrasive Discs.
- Tip: It is advisable to work with a soft interface pad when sanding curved areas.

9 Blending in to adjacent parts

- ▶ 3M™ Hookit™ Flexible Foam Disc P800 - P1000.
 - ▶ Prepare adjacent areas of the OEM clearcoat.
- Note: For maximum process safety.

PERSONAL SAFETY

• Comfort Particle Mask P2

• Hearing Protection

• Comfort Goggles

• Reusable Workwear

• Safety Gloves

1 Sanding down the job area

- ▶ Sand down the area to be repaired to the bare metal substrate
 - ▶ To remove coatings quicker, use the ROTEX motion setting
 - ▶ To refine previous sanding scratches, switch to ROTEX orbital random motion, keeping the previous abrasive disc on the machine
- Note: For aluminium substrates and workplaces, always use a pneumatic sanding tool such as Festool Automotive Systems LEX 3 150/7 and follow instructions of ATEX directive 94/9/EG for Zone 22 areas

3M™ Hookit™ Cubitron™ II 80+ - 120+ - 125mm

Festool RO 125

3M™ Hookit™ Cubitron™ II 80+ - 120+ - 150mm

Festool LEX 3 150/7

2 Cleaning of the surface

- ▶ Degrease the surface

3M™ General Purpose Adhesive Cleaner

3M™ Professional Panel Wipes

3 Calibration of a new cartridge

- ▶ Insert the cartridge into a suitable application gun
 - ▶ Before attaching the mixer to the cartridge, equalize cartridge by squeezing out a small amount of material until both components are equally extruded
 - ▶ Attach the mixing nozzle and discard the first 2-4 cm of extruded material, to remove any improperly mixed material
- Note: The previous step is only necessary when using a new cartridge.

3M™ FC Epoxy Metal Filler

3M™ Static Mixing Nozzle

3M™ High Power Manual Gun

3 Application

- ▶ First apply a "tight" coat of material onto the welded area, in order to ensure that the material completely covers any pinholes from the previous welding steps. Additional layers of the product can be applied immediately onto the first layer in a "wet on wet" process, in order to build up the repair to the required level
- ▶ Working time and mixing nozzle open time 15 -20 min @ 22 °C
- ▶ Recommended settings for applicators: pneumatic max. inlet pressure 5.5 bar / battery driven 3kN, max speed 180mm/min

3M™ Plastic Spreader

4 Drying

- ▶ The curing of 3M™ FC Epoxy Metal Filler can be accelerated using IR drying after the initial gelling period. Wait 10 minutes before using an IR dryer to heat for 10-20 minutes with a panel temperature of 70 °C
 - ▶ Airdrying: sandable ~ after 4h @ 22 °C ambient temperatures
- Tip for use: warming up the material & surface to ~30°C before material application will help to accelerate curing, particularly at cold ambient temperatures

5 Pre-sanding of the filler area

- ▶ Pre-sanding step can also be done by using traditional body files

6 Sanding of the filler area

- ▶ Flat sanding of the filler area
- ▶ To remove coatings quicker, use the ROTEX motion setting
- ▶ To refine previous sanding scratches, switch to ROTEX orbital random motion, keeping the previous abrasive disc on the machine

3M™ Hookit™ Cubitron™ II 80+ - 120+ - 125mm

Festool RO 125

3M™ Hookit™ Cubitron™ II 80+ - 120+ - 150mm

Festool LEX 3 150/7

7 Cleaning of the surface

- ▶ Thoroughly degrease the surface

3M™ General Purpose Adhesive Cleaner

3M™ Professional Panel Wipes

Optional - second layer application

- ▶ Apply a further layer of 3M™ FC Epoxy Metal Filler if necessary and repeat drying and sanding steps as recommended in the previous steps
- ▶ Maximum finished thickness should not exceed 4-6 mm, maximum layer thickness should not exceed 2-3 mm
- ▶ Follow car manufacturer and paint company recommendations for subsequent steps

3M™ FC Epoxy Metal Filler

3M™ Static Mixing Nozzle

3M™ High Power Manual Gun

Abrasives and Abrasive Accessories

3M™ Hookit™ Abrasive Disc 245

Achieve a consistent finish with 3M™ Hookit™ Abrasive Disc 245. Coated in aluminium oxide with resin bonding to prevent premature burning, our tough disc offers excellent durability and are available in a variety of hole configurations, sizes and grades.

- Get high performance from a tough and durable disc
- Use for panel shop sanding
- Choose discs from a variety of hole configurations, sizes and grades

Abrasives and Abrasive Accessories

Non-woven Discs

Scotch-Brite™ Clean and Strip Disc

Scotch-Brite™ Clean and Strip Disc is designed to effectively clean welds, remove rust and strip paint. Our extra coarse grade open web discs provide a smooth running loading-resistant wheel, which is ideal for removing soft coatings.

- Reach into tight corners for complete cleaning, stripping and surface preparation
- Cover a bigger surface area than with wire brushes
- Uses extra coarse grade silicon carbide for aggressive cutting and a finer finish than with wire brushes

Product ID	Part Number	Product	MOQ	Order Unit	MSU	SU
7100182637		Scotch-Brite™ Clean and Strip Disc CS-RD, 150 mm x 13 mm, Blue	4320	Each		

Scotch-Brite™ Clean and Strip XT Pro Disc

Scotch-Brite™ Clean and Strip XT Pro Disc features silicon carbide abrasive mineral incorporated into an open nylon web. Our discs effectively remove rust, paint, mill scale, coatings and adhesives from surfaces without significantly altering the base material.

- Removes rust, paint, mill scale and coatings from metal fast
- High-strength fibre resists chunking and performs well on edges
- High conformability provides a larger contact patch for faster removal rates

Abrasives and Abrasive Accessories

Scotch-Brite™ Hookit™ 7447 PRO Disc

Our Scotch-Brite™ Hookit™ 7447 PRO Disc combines flexible fibers with outstanding cut to help you accomplish tough cleaning jobs or produce fine finishing results, use after use. It is an excellent alternative to steel wool, wire brushes, sandpaper, and other non-woven products for cleaning or finishing tasks. The Hookit™ backing enables convenient attachment on a random orbital sander.

- Use for cleaning, scuffing, finishing, and light paint removal on a variety of metals and plastics
- Unique fibre coating capability assures a fast, consistent scratch
- Very fine grade aluminum oxide abrasive cleans and finishes efficiently

Fibre Grinding Discs

3M™ Cubitron™ II Abrasive Fibre Disc 786C

Remove welds and paint with 3M™ Cubitron™ II Abrasive Fibre Discs. Our Cubitron™ II fibre discs last up to twice as long as conventional abrasives, cutting faster and leaving a finer more uniform finish.

- Cut 30% faster than premium abrasives
- Long lasting with consistent cut quality
- Deliver a finer, more uniform finish

3M™ Cubitron™ II Fibre Disc 982CX Pro

Get more done with 3M™ Cubitron™ II Fibre Disc 982CX Pro. With a re-engineered 3M Precision-Shaped Grain, these fibre discs take the legendary cutting speed and life of 3M™ Cubitron™ II Abrasives to a new level. Available in 36+ grit for medium and high-pressure applications like weld grinding, beveling and heavy deburring.

- Re-engineered 3M Precision-Shaped Grain takes legendary speed and life to a new level
- Longest-lasting 3M fibre disc helps boost productivity and minimize disc changes in manual and automated applications
- Triangular ceramic grain wears evenly, runs cool and stays sharp through the life of the disc

3M™ Cubitron™ II Fibre Disc 982CX Pro Kit

Get even more done when the 3M™ Cubitron™ II Fibre Disc Pro 982CX is combined with a 3M™ High Performance Ribbed Back-Up Pad. With a re-engineered 3M Precision-Shaped Grain, these fibre discs take the legendary cutting speed and life of 3M™ Cubitron™ II Abrasives to a new level. 3M™ Disc Back-up Pads provide the firm support required for grinding applications which helps mineral break down to optimise performance.

- Re-engineered 3M Precision-Shaped Grain takes legendary speed and life to a new level especially when used with extra hard 3M™ High Performance Ribbed Back-Up Pads.
- Using these fibre discs with extra hard back-up pads makes them cut with less pressure required than traditional fibre discs, helping reduce the demands on operators.
- Longest-lasting 3M fibre disc helps boost productivity and minimize disc changes in manual and automated applications

Flap Discs

3M™ Cubitron™ II Flap Disc

The 3M™ Cubitron™ II Flap Discs is engineered for a faster cut, longer disc life and a more uniform finish vs. conventional ceramic abrasives, which allows easy and smooth removal of paint and rust. Flexible flaps feature our Precision Shaped Grain (PSG) technology – super-sharp triangular grains, electrostatically oriented on a flexible backing for an extremely fast, even cut. Overlapping flaps provide cushion for grinding and blending with one disc.

- Cuts 30% faster and lasts 2x longer than other conventional ceramic abrasives for increased productivity and a consistent repair finish
- Runs cooler and requires less pressure than other conventional ceramic abrasives
- Precision Shaped Grain (PSG) technology results in a more uniform finish, less rework, less refining of deep scratches

Product ID	Part Number	Product	MOQ	Order Unit	MSU	SU

3M™ Cubitron™ II Flap Disc 967A

3M™ Cubitron™ II Flap Disc 967A delivers superior cut rates in low to medium-high pressure applications. Our discs are ideal for flat surfaces or outside edgework, especially where final finish and gouge resistance are important.

- Engineered to cut faster and last longer than competitive ceramic products with 3M Precision Shaped Grain
- Cool operating temperature decreases metal discolouration/oxidation and heat related stress cracks
- Flap discs grind and blend in a single step meaning they can replace bonded wheels and fibre discs

Quick Change Discs

Scotch-Brite™ Roloc™ Surface Conditioning Disc SC-DR

Scotch-Brite™ Roloc™ Surface Conditioning Disc combines our durable, non-woven disc with the efficient Roloc quick-change attachment system, for effective cleaning, finishing, blending and deburring. These discs use non-woven fibre which conforms well to irregular surfaces.

- Tough non-woven disc aggressively deburrs and finishes
- Conformable, non-woven disc with Roloc™ backing for aggressive cutting
- Achieve consistent finishes with open-web construction that resists loading and runs cool

Bristle Brushes & Discs

Scotch-Brite™ Roloc™ Bristle Disc RD-ZB

Scotch-Brite™ Roloc™ Bristle Disc comprises of our Ceramic Abrasive Grain, blended with aluminium oxide and moulded, flexible bristles which provide more surface contact than wire brushes and keep their abrasive properties throughout the life of the disc.

- Moulded abrasive filled bristles surpass wire brushes in stripping, deburring, blending, finishing, polishing, cleaning
- Ceramic Abrasive Grain blend provides high degree of finish quality throughout the life of the disc
- Bristle spacing is ideal for coating removal and other high-loading substances

Abrasives and Abrasive Accessories

Scotch-Brite™ Roloc™ Body Man's Bristle Disc

Scotch-Brite™ Roloc™ Body Man's Bristle Disc is made with stiff polymer bristles that are spaced apart to form a radial pattern. Our bristle disc design offers optimal load resistance. The combination of Ceramic Abrasive Grain and polymer bristles makes these discs ideal for soft and hard metals.

- Moulded, abrasive-filled bristles surpass wire brushes to strip, deburr, blend, finish, polish and clean with less pressure
- 3M™ Ceramic Abrasive Grain provides aggressive cutting and consistent finish quality for the disc lifespan
- Flexible bristles require less pressure than wire brushes and conform to contours, even on complex parts

3M™ Green Corps™ Reinforced Weld Grinding Wheel

3M™ Green Corps™ Reinforced Weld Grinding Wheel features extra-durable reinforcement for added strength and longer life during weld grinding operations. A tough fiberglass cloth screen scrim adds reinforced performance and longer wheel life, and supports aluminum oxide mineral abrasive. These 3” resin-bonded wheels are great for cutting spot welds and grinding hard-to-reach areas. DO NOT USE TOOLS WITHOUT GUARDS.

- Built for tough weld grinding
- Fiberglass cloth screen scrim reinforcement adds strength and wheel life
- Aluminum oxide mineral abrasive is durable, cuts fast, and performs well on many surfaces

Sanding Sponges

3M™ Softback Sanding Sponge

3M™ Softback Sanding Sponge is a flexible foam pad that reaches tricky areas including headlight openings, around door handles and door jambs. Our sponge can be used wet or dry and helps to eliminate finger marks.

- Flexible foam pad to sand or key edges, rims and hard-to-reach areas by hand
- Soft Sanding Sponge constructions reduces the risk of burn-through on edge / rim areas
- Helps to eliminate finger marks

Net Sheets & Rolls

Focus

3M™ Cubitron™ II Net Sheet Roll

3M™ Cubitron™ II Net Sheet Rolls are a fast-cutting and long-lasting family of net sheet rolls that deliver the exceptional cut rate and extended life of a Cubitron II abrasive. They're designed to help dust extractors perform their best, leaving virtually no dust on the work surface or in the environment.

Pair with a 3M recommended sanding and dust extraction system to create your shop's ideal dust capture system.

- Fast-cutting, long-lasting net sheets are built with patented 3M™ Cubitron™ II precision-shaped grains.
- They help dust extractors achieve their best-possible performance – whether it's a self-generating-vacuum sander, a central vacuum system or a portable dust extractor
- The patented triangular-shaped mineral grains on the sheets slice through substrates rather than gouging or "plowing" like conventional abrasive grains, helping the sheet run cooler, cut faster, and last longer

3M™ Blue Net Sheet Roll

3M™ Blue Net Sheet Rolls are built with an engineered ceramic-mineral blend of abrasives that deliver a fast cut rate and long sheet life. They also offer excellent dust removal when used with a dust extraction system.

- Sanding discs that offer outstanding performance at a competitive price
- Built with an engineered ceramic-mineral blend that delivers an excellent cut rate and life
- Balanced for outstanding abrasive performance for cut, life and dust extraction

Sandpaper Sheets & Rolls

Focus

3M™ Cubitron™ II Hookit™ Clean Sanding Abrasive Sheet 737U

3M™ Cubitron™ II Hookit™ Clean Sanding Abrasive Sheets 737U are premium long lasting sanding sheets with self-sharpening grains, which also provide a faster cut whilst the multi-hole pattern delivers excellent dust extraction.

- Get 30% faster cutting compared to other premium abrasives
- Precision shaped, self-sharpening grains last twice as long vs. conventional industrial abrasives
- Sharper cutting surface means less pressure is required for reduced friction and wear

3M™ Wetordry™ Abrasive Sheet 401Q

Use 3M™ Wetordry™ Abrasive Sheet 401Q for sanding applications needing a fine grit and light touch, such as auto body wet sanding and paint finishing. We've combined our durable waterproof A-weight paper backing and fast-cutting silicon carbide mineral for consistent scratch patterns and easier buffing.

- Convenient sheet can be used wet or dry on paint, primer, gel coat and metal
- Waterproof backing supports wet applications for decreased loading and a faster cut
- Sand every type of area

Scotch-Brite™ 7447 PRO Roll

Scotch-Brite™ 7447 PRO Roll combines flexible fibres with finely graded aluminium oxide particles for a sharp consistent cut. Use our 7447 PRO instead of steel wool, wire brushes, sandpaper and other non-woven products for cleaning or finishing.

- With fast cutting denser mineral coating on fibres compared to 7447, for a uniform scratch
- Very fine grade aluminium oxide abrasive cleans and finishes efficiently
- Long lasting nylon non-woven material resists tearing, loading and rust

Scotch-Brite™ 7448 PRO Roll

Scotch-Brite™ 7448 PRO Roll comprises of durable, precision coated fibres that cut fast and provide consistent finishes. Our unique design of ultra-fine mineral and coated, flexible fibres is perfect for prepping surfaces for paint and primer, general scuffing and hand blending.

- Use for light scuffing and surface prep for better subsequent coating adhesion
- Ideal for cleaning, scuffing, finishing, and light paint removal on a variety of metals and plastics
- Denser mineral placement than 7448 which allows for uniform scratch and a faster cut rate

Focus

3M™ Hookit™ Dust Extraction Flexible Sanding Block

These 3M™ Hookit™ sanding blocks combine the lightweight flexibility of traditional foam blocks with the dust extraction power and control of dust-free sanding blocks. The blocks flex to help easily restore contours and bodylines, while providing a firm backing for abrasives. Features 3M™ Hookit™ attachment system. They include a vacuum regulator that lets the operator adjust suction for easier block control when sanding.

- A lightweight sanding block with a firm-but-flexible backing which helps easily restore contours and bodylines.
- When used with a vacuum system and compatible abrasives, this 3M™ Hookit™ Dust Extraction Flexible Sanding Block helps capture dust which can increase abrasive life while helping reduce dust in the shop environment.
- The 3M™ Hookit™ hook and loop attachment system allows for easy abrasive changeouts.

3M™ Trizact™ Hookit™ Abrasive Hand Pad

Use 3M™ Trizact™ Hookit™ Abrasive Hand Pad comfortably thanks to a wide strap for holding the pad to the operator's hand. Our abrasive hand pad is made with soft foam rubber for conformability and spreading out finger pressure.

- Designed for 3M™ Hookit™ Discs
- Strap holds pad on hand
- Soft foam rubber spreads out sanding pressure

Product ID	Part Number	Product	MOQ	Order Unit	MSU	SU
7000034317	05791	3M™ Trizact™ Hookit™ Abrasive Hand Pad, 150 mm, 05791		Each		
7000084116	05792	3M™ Trizact™ Hookit™ Abrasive Hand Pad, 150 mm, Halfround, 05792		Each		

3M™ Hookit™ Low Profile Abrasive Disc Back-up Pad

3M™ Hookit™ Low Profile Abrasive Disc Back-up Pad is specially designed for use with 6 inch Hookit discs. Our back-up pad has a low profile design for better levelling and faster removal rates when flat sanding.

- Low profile design provides better levelling and faster removal rates when flat sanding
- Made with a medium density foam
- Features a blunt edge for improved durability

Product ID	Part Number	Product	MOQ	Order Unit	MSU	SU
7100058086	28729	3M™ Hookit™ Low Profile Abrasive Disc Back-up Pad, Red, 150 mm x 9.5 mm x 15.6 mm, 5/16-24 in, 28729		Each		

Abrasives and Abrasive Accessories

3M™ Hookit™ Soft Abrasive Disc Pad

3M™ Hookit™ Soft Abrasive Disc Pad is ideal for use with fine grade abrasives for sanding primer on conformable surfaces, best used with a slow speed polisher/grinder.

- Designed for 203 mm (8 in) 3M™ Hookit™ II Discs
- Conformable
- Produces finer finishes

Product ID	Part Number	Product	MOQ	Order Unit	MSU	SU
7000045673	05768	3M™ Hookit™ Soft Abrasive Disc Pad, 203 mm (8 in), 05768		Each		

3M™ Hookit™ Soft Interface Pad

Maximise cushion and conformability during the automotive sanding process with 3M™ Hookit™ Soft Interface Pad. Use our pads between Hookit™ discs and Hookit™ back up pads for quick change outs.

- Soft foam construction conforms to contours for a finer finish
- Adds support to disc pad for improved abrasive cut and closer edge sanding
- Applies effortlessly between Hookit™ discs and Hookit™ back-up pads for quick changeouts

Mandrels & Adapters

3M™ Adaptors for Polishers

Adaptor for 5/8" shaft polishers, for use with 3M™ Screw On Double Sided Buffing pads.

- For use with 5/8" shaft rotary polishers
- Eliminates the concern of exposed threads when using
- Eliminates the potential scratching of vehicles while using 3M screw on double side pads

Product ID	Part Number	Product	MOQ	Order Unit	MSU	SU
7100017371	05710	3M™ Adaptors for Polishers, Buff Pad Adaptor, 05710		Each		

3M™ Perfect-It™ Quick Connect Adaptor

3M™ Perfect-It™ Quick Connect Adapter makes it easy to connect or disconnect double-sided buffing pads on rotary polishers. Our heavy-duty adaptor saves both time and effort in an automotive body shop by making pad changes so quick and simple. 5/8", or M14 thread.

- Allows quick changes of buffing pads
- Makes it easy to change between compound and polishing pads
- Provides a reliable connection between pad and polisher

Abrasives and Abrasive Accessories

Dust Extraction Systems

3M™ Dust Extractor

The 3M™ Dust Extractor is a lightweight, compact dust extraction, ideal for body and paint repair shops. It features strong dust extraction power and is compatible with pneumatic and electric sanders.

- Lightweight, compact unit with strong dust extraction power
- Helps shops boost efficiency by helping to reduce rework and cleanup time
- Compatible with pneumatic or electric sanders

Product ID	Part Number	Product	MOQ	Order Unit	MSU	SU
7100242524	33759	3M™ Dust Extractor, 45 L, 230V, Plug Type F, 33759				
7100246015		3M™ Dust Extractor, 33761, 45 L, 230V, Plug Type G, 1/Case				

3M™ Antistatic Electric Hose

The 3M™ Antistatic Electric Hose is designed for use with the 3M™ Clean Sanding System when using electric sanders or hand blocks. The built-in air regulator collar allows the operator easily to adjust suction. Its quick-connection couplings allow easy attachment to tools and the 3M dust extractor.

- Adjustable airflow collar at the tool end of the hose allows user to adjust suction
- Use with electric sanders or sanding blocks
- Quick connection between tools and the 3M dust extractor

Product ID	Part Number	Product	MOQ	Order Unit	MSU	SU
7100247475	33646	3M™ Antistatic Electric Hose, 5 m, 33646				

3M™ Antistatic Pneumatic Hose

The 3M™ Antistatic Pneumatic Hose works with the 3M™ Clean Sanding System. The built-in air regulator collar allows the operator to adjust suction. The air hose is built into the vacuum hose to help reduce snagging, clutter and tangling.

- Adjustable airflow collar at tool end of hose allows user to adjust suction
- The combined air and vacuum hose helps reduce tangling and snagging
- Air supplied using standard 1/4-inch high-flow quick connection air couplings

Product ID	Part Number	Product	MOQ	Order Unit	MSU	SU
7100247664	33645	3M™ Antistatic Pneumatic Hose, 5 m, 33645				

Abrasives and Abrasive Accessories

3M™ Multi Hole Block Hose

Extract dust and debris with 3M™ Multihole Block Hose. Our flexible and durable block hose takes dust and debris from sanding and blocking applications to Dust Extract systems.

- Extract dust and debris from sanding and blocking applications
- Get a flexible and durability with 3 or 6 metre hose
- Use to attach to the 3M™ Hookit™ Purple+ Multihole Handblock Multihole and other systems

Product ID	Part Number	Product	MOQ	Order Unit	MSU	SU
7000032192	05174	3M™ Multi Hole Block Hose, 6 m, 05174		Each		

3M™ Dust Extractor Filter Bag

3M™ Dust Extractor Filter Bag captures dirt and dust collected by the 3M™ Clean Sanding System. Designed to maximize the dust collection capacity of both 30-liter and 45-liter models of 3M™ Dust Extractors. The bags are built from a tough but flexible non-woven plastic material. The easy close plastic closure cap helps prevent leakage during disposal.

- Fits both 30-liter and 45-liter models of 3M™ Dust Extractors
- Durable non-woven material traps and holds dirt and dust.
- Plastic cap easily seals full bags to help prevent leaks during disposal

Product ID	Part Number	Product	MOQ	Order Unit	MSU	SU
7100249076	33648	3M™ Dust Extractor Filter Bag, 33648				

3M™ Dust Extractor Handle Extension

The 3M™ Dust Extractor Handle Extension adds an extra level of convenience to the 3M™ Clean Sanding System 45-liter dust extractor. The handle is built from durable steel tubing and is coated with a tough black soft-grip material. The handle helps to facilitate easy transport of the extractor base from a standing position. Attaches easily to the extractor unit.

- Helps to facilitate easy transport of extractor
- Made from durable steel coated with black soft-grip material
- Easily attaches to 3M™ Clean Sanding System 45-liter dust extractors

Product ID	Part Number	Product	MOQ	Order Unit	MSU	SU
7100247493	33765	3M™ Dust Extractor Handle Extension, 33765				

Abrasives and Abrasive Accessories

3M™ Clean Sanding System Workstation

3M™ Clean Sanding System Workstation adds storage, portability and organization to the 3M™ Clean Sanding System. The steel cart is built to hold one 45-liter 3M Dust Extractor base. The unit includes two repositionable tool hangers and two repositionable hose hangers; a two-shelf locking cabinet; waste compartment; large smooth-riding rubber wheels, and a rubberized work surface.

- Holds one 45-liter 3M™ Clean Sanding System Dust Extractor
- Four repositionable tool and hose holders (two of each) let technicians customize the cart for their needs
- The two-shelf locking storage cabinet can keep abrasives and materials in easy reach

Product ID	Part Number	Product	MOQ	Order Unit	MSU	SU
7100247665	33653	3M™ Clean Sanding System Workstation, 33653				

3M™ Clean Sanding System Workstation Extension

3M™ Clean Sanding System Workstation Extension adds customizable storage and organization to the 3M™ Clean Sanding System Workstation. The extension's three panels allow customization of storage using 15 included hooks. The extension provides additional mounting locations for the Workstation's tool holder and hose hooks.

- The 3M™ Clean Sanding System Workstation Extension expands the storage and organization capabilities of the 3M™ Clean Sanding System
- The all-steel three-panel extension provides additional mounting positions for the Workstation's hose hooks and tool holders
- Kit includes: three-panel extension, 5 Long Double Hooks, 5 Long Single Straight Hooks and 5 Short hooks

Product ID	Part Number	Product	MOQ	Order Unit	MSU	SU
7100247666	33654	3M™ Clean Sanding System Workstation Extension, 33654				

3M™ Dust Extractor Filter

3M™ Dust Extractor Filter Pack contains polyester replacement filters for the 3M™ Clean Sanding System's 30-liter and 45-liter dust extractors. The filters help protect the motor unit of the extractor and filter the unit's exhaust air.

- Two pack of panel-style filters for 30-liter and 45-liter dust extractors
- Durable polyester filter material is accordion-folded to help maximize surface area in a small footprint.
- Flexible seal helps to prevent dust from returning to your work area and keep it away from the extractor's motor.

Product ID	Part Number	Product	MOQ	Order Unit	MSU	SU
7100249077	33647	3M™ Dust Extractor Filter, 33647				

Abrasives and Abrasive Accessories

3M™ Dust Extractor Y-Connector

The 3M™ Dust Extractor Y-Connector allows a 3M™ Dust Extractor to support two vacuum tools at the same time. The user can connect two tools simultaneously. The connector's built in clapet valve provides a firm seal when only one hose is connected. Dual o-rings forms a seal between the Y-Connector and the dust extractor.

- Allows two hoses to be connected to 3M™ Dust Extractors, 45 ltr, allowing two tools to be used simultaneously
- Durable plastic connector with dual o-rings forms a seal when attached to the dust extractor
- Connector has spring-loaded clapet valve which seals an unused hose port.

Product ID	Part Number	Product	MOQ	Order Unit	MSU	SU
7100247480	33652	3M™ Dust Extractor Y-Connector, 33652				

Power tools

Choosing the right abrasives or compounds for your paint finishing and automotive repair project is critical — and so is using the right tool. 3M offers a range of systems of high-quality metal grinding and sanding tools, disc backup pads and accessories to optimise abrasive performance and maximize productivity. Whether your job calls for file belt sander, a sanding tool or a polishing machine, 3M has you covered with the power tools, accessories and service you need.

Power Sanders

3M™ File Belt Sander

The 3M™ File Belt Sander for Body Repair features the technology and versatility of metalworking belt sanders in a size that's ideal for automotive collision repair. This narrow-profile tool is excellent for cutting in tight areas, including cutting, dressing and refining spot welds as well as blending and finishing. This file belt sander is designed for use with 3M™ Cubitron™ II abrasives.

- Lightweight file belt sander is ideal for cutting and finishing work in body repair
- Powerful 495W motor is excellent for collision repair applications
- Light weight makes for greater manoeuvrability and less operator fatigue

3M™ File Belt Sander

The 3M™ File Belt Sander for Body Repair features the technology and versatility of metalworking belt sanders in a size that's ideal for automotive collision repair. This narrow-profile tool is excellent for cutting in tight areas, including cutting, dressing and refining spot welds as well as blending and finishing. This file belt sander is designed for use with 3M™ Cubitron™ II abrasives.

- Lightweight file belt sander is ideal for cutting and finishing work in body repair
- Powerful 495W motor is excellent for collision repair applications
- Light weight makes for greater manoeuvrability and less operator fatigue

3M™ Random Orbital Sander

The 3M™ Random Orbital Sander is designed to help deliver high-quality surface preparation and finishing results while helping to improve the performance of your 3M Abrasives. With a multihole backup pad and shroud that provide effective dust extraction. Pneumatic sander includes variable speed adjustments to help give the technician more control.

- Variable speed adjustment lets you choose the speed for your task
- Multihole back-up pad and shroud for effective dust extraction
- Helps to improve the performance of 3M Abrasives

Power tools

3M™ Electric Random Orbital Sander (CSS)

The 3M™ Electric Random Orbital Sander is designed to help deliver high-quality surface preparation and finishing results while helping to improve the performance of your 3M Abrasives.

With electric power you can help increase mobility without the need for compressed air.

A multihole back-up pad and shroud offer effective dust extraction, and the brushless motor requires less maintenance, no brushes to replace.

- Variable speed adjustment lets you choose the speed for your task
- Multihole back-up pad and shroud for effective dust extraction
- Helps to improve the performance of 3M Abrasives

Adhesives, Sealants & Applicators

Structural Adhesives

Focus

3M™ Impact Resistant Structural Adhesive

3M™ Impact Resistant Structural Adhesive (IRSA) is formulated for true automotive OEM-specified structural bonding applications, excellent for collision absorption in steel structures and advanced lightweight aluminum alloys. This two-part epoxy adhesive delivers extended worktimes – up to 1 hour – and can be rapidly heat-cured. The adhesive changes from silver to purple as the adhesive cures.

- Formulated specifically for collision absorption in OEM-specified structural bonding applications
- Two-part epoxy bonds steel and automotive aluminium, great for lightweight structures
- Can be weld-bonded or rivet-bonded immediately after application

Product ID	Part Number	Product	MOQ	Order Unit	MSU	SU
7100273723	07333	3M™ Impact Resistant Structural Adhesive, 200 ml, 07333		Each		

Focus

3M™ Panel Bonding Adhesive

The 3M™ Panel Bonding Adhesive is a two-part epoxy used to bond steel, aluminum, SMC, and FRP (traditional fiberglass). The primary use is to replace quarter panels, roofs, box sides, van sides, utility vehicle sides and door skins.

- A high performance two component epoxy adhesive
- Bonds a variety of steel, aluminum, SMC, and FRP (traditional fiberglass) non-structural components. Also use to reinforce welded or riveted structural components
- It can be spot welded through or used in conjunction with rivet bonds

3M™ Structural Adhesive

Bond metal, glass and plastic with 3M™ Structural Adhesive. Our structural adhesive can be used for trim, fiberglass and flexible body parts repair. It's a two-part general purpose grey adhesive that spreads smoothly and is fast-drying.

- Bond metal, glass and plastic with our fast-drying structural adhesive
- Use for trim, fiberglass and flexible body parts repair
- Efficient mixing nozzle gives controlled flow with no air bubbles

7100271764	08122	3M™ Structural Adhesive, 2:1, 50 ml, 08122		Each		

Adhesives, Sealants & Applicators

3M™ Structural Plastic Adhesive

Bond plastic, fibreglass, ceramic, metal and most substrates with 3M™ Structural Plastic Adhesive. This adhesive is a black, two-part urethane product delivered in a dual-component cartridge.

- For back and front side repair of plastic parts
- Easy cartridge application
- For additional strength, use with plastic reinforcement tape

Product ID	Part Number	Product	MOQ	Order Unit	MSU	SU
7100222832	55047	3M™ Structural Plastic Adhesive, 200 ml, 55047		Each		

Flexible Adhesives

3M™ Aerosol Adhesive

Aerosol adhesives are used for bonding lightweight internal trim, eg headlinings and plastics.

- Non-clog aerosol head will adjust to give wide or narrow lace spray pattern
- Fast drying
- Cover large areas quickly, compared to hand application

Product ID	Part Number	Product	MOQ	Order Unit	MSU	SU

Adhesives, Sealants & Applicators

Sealants

3M™ MS Caulkable Sealer

3M™ MS Caulkable Sealer is a one part MS polymer-based moisture curing general purpose seam sealer in a cartridge.

- Can be painted over immediately with water based paints
- Should be painted over within 2 hours or lightly scuffed using a grey Scotchbrite pad.
- Isocyanate free

Product ID	Part Number	Product	MOQ	Order Unit	MSU	SU
7000079955	08855	3M™ MS Caulkable Sealer, 290 ml, 08855		Each		

3M™ Multi-Purpose Seam Sealer

Improve your repair process with 3M™ Multi-Purpose Seam Sealer . Our sealer allows wet on wet painting for faster sealing processing times. It can be sprayed, extruded or brushed.

- Get a variety of finishes
- Can be sprayed, brushed or extruded
- Flexible as anti-chip coating

7100074739	50600	3M™ Dynamic Mixing System Applicator, 50600		Each		

3M™ Dynamic Mixing System Introductory Kit

A kit containing items necessary to get started with 3M's Dynamic Mixing System: Applicator, Nozzles, and Accessories.

- Dynamic Mixing System Pneumatic Applicator
- DMS Nozzles (Red) for Body Filler
- DMS Nozzles Dispenser / Box rack

Product ID	Part Number	Product	MOQ	Order Unit	MSU	SU
7100058124	50604	3M™ Dynamic Mixing System Introductory Kit, 50604		Kit		

3M™ MS Universal Sealer Gun

3M™ MS Universal Sealer Gun is a pneumatic applicator, which allows the extrusion of all kinds of single-component sealants.

- Pneumatic applicator
- Works with sachets and cartridges
- Easy to adjust and handle

Product ID	Part Number	Product	MOQ	Order Unit	MSU	SU
7000041360	08993	3M™ MS Universal Sealer Gun, Pneumatic, 08993		Each		

Adhesives, Sealants & Applicators

3M™ Pneumatic Gun for 2 part cartridges

Our 3M™ Pneumatic Gun for 2-Part Cartridges is designed for dispensing 3M 2-part adhesives and sealers from 200 ml cartridges. This pneumatic applicator gun is ideal for large volume jobs. It allows you to apply a range of two-component repair epoxies quickly and smoothly, saving time and reducing rework. Snap-in cartridge system eliminates premixing and maximizes material use.

- Use with 3M 2-component cartridges (200 ml)
- Get smooth, consistent application of sealants matching OEM appearance
- Save time and work efficiently on large volume work thanks to pneumatic system

Product ID	Part Number	Product	MOQ	Order Unit	MSU	SU
7100247779	09930	3M™ Pneumatic Gun for 2 part cartridges, 2:1 200-70-01-A1, 09930		Each		

3M™ Pneumatic Gun for No Cleanup

Use 3M™ Pneumatic Gun for No Cleanup solution, for a fast, easy and clean way to work. Use with our disposable 2k sprayable sealer bags. Our robust aluminium tool dispenses product quickly and easily. Simply dispose of the sachet and nozzle, and the gun's ready to use again.

- Work more efficiently, thanks to no clean-up when the gun is used correctly
- Use with 3M 2k sprayable sealer bags
- Dispense product quickly and easily

Product ID	Part Number	Product	MOQ	Order Unit	MSU	SU
7000041353	08801	3M™ Pneumatic Gun for No Cleanup, 08801		Each		

3M™ Pneumatic Guns for Cartridges

The 3M™ Pneumatic Gun for Cartridge is a lightweight pneumatic gun for sealer cartridges.

- Lightweight aluminium body
- For easy handling of sealer cartridges
- 1/4" outer thread for air connector

Product ID	Part Number	Product	MOQ	Order Unit	MSU	SU
7000041351	08012	3M™ Pneumatic Guns for Cartridges, Applicator for 310 ml Cartridges, 08012		Each		

3M™ Pneumatic Guns for Sachets

3M™ Pneumatic Guns for Sachets are lightweight, well-balanced pneumatic guns designed to extrude various sizes of collapsible aluminium foil sachets.

- Lightweight aluminium body
- For easy handling of various sizes of sealer sachets
- Get fast, accurate product application

Coatings & Fillers

3M offers a wide range of protective coatings and fillers - starting with interior corrosion protection materials such as Inner Cavity Waxes, allowing to reach and protect metal from the inside and thus preventing inner corrosion as well as anti-chip coatings, used to protect vulnerable, painted parts of the vehicle such as sills, wings, wheel arches and valances. Applied with the 3M™ Performance Spray Gun and the 3M™ PPS™ Series 2.0 H/O Pressure Cup, a wide range of textures from very smooth to very coarse can be easily achieved simply by adjusting the gun and choosing one of the available atomising heads. This application process allows to match virtually any OEM texture. Our selection of 3M body fillers, glazes and putties can take you a long way toward smooth, permanent, absolutely consistent body repairs on a full range of substrates.

Coatings & Fillers

Automotive Fillers & Repair

3M™ Dynamic Mixing System General Purpose Body Filler

A smooth, midweight, easy to sand, general purpose body filler in 3M™s unique DMS dispensing system for a wide range of applications and temperatures.

- Excellent adhesion to steel, galvanised or aluminium
- Mid weight filler, easy to sand
- Good filling properties

Product ID	Part Number	Product	MOQ	Order Unit		SU
7100050738	51002	3M™ Dynamic Mixing System General Purpose Body Filler, 276 ml, 51002		Each		

3M™ Dynamic Mixing System Heavy General Purpose Filler

A heavy-body general purpose body filler in 3M's unique DMS dispensing system for a wide range of applications and temperatures, best suited for deep dent filling, works well at warmer temperatures too.

- Excellent adhesion to steel, galvanised or aluminium
- Heavy weight, yet easy to spread and sand filler
- Good filling properties

Product ID	Part Number	Product	MOQ	Order Unit		SU
7100050739	51003	3M™ Dynamic Mixing System Heavy General Purpose Filler, 276 ml, 51003		Each		

3M™ Dynamic Mixing System Light General Purpose Filler

3M™ Dynamic Mixing System Light General Purpose Filler is a very smooth lightweight bodyfiller in a cartridge with hardener ready for use with 3M™ Dynamic Mixing System.

- Very smooth and creamy to spread
- Fast to cure, works well also at lower temperatures
- Lightweight - particularly easy to sand

Product ID	Part Number	Product	MOQ	Order Unit		SU
7100055256	51004	3M™ Dynamic Mixing System Light General Purpose Filler, 276 ml, 51004		Each		

Coatings & Fillers

3M™ Dynamic Mixing System Light General Purpose Filler - Long

3M™ Dynamic Mixing System Light General Purpose Filler is a very smooth lightweight bodyfiller in a cartridge with hardener ready for use with 3M™ Dynamic Mixing System. This filler has a longer open time, thus is ideal for higher temperatures or larger work areas.

- Very smooth and creamy to spread
- Lightweight - particularly easy to sand
- Longer open time - ideal for higher temperatures or larger work areas

Product ID	Part Number	Product	MOQ	Order Unit		SU
7100095688	51005	3M™ Dynamic Mixing System Light General Purpose Filler - Long, 276 ml, 51005				

3M™ General Purpose Body Filler

3M™ General Purpose Body Filler is a smooth, midweight, general purpose body filler for a wide range of applications and temperatures. It's easy to apply and spread, cures fast and is easy to sand.

- Works well with all mainstream paint systems
- Easy to spread
- Very easy to sand midweight filler

Product ID	Part Number	Product	MOQ	Order Unit		SU
7000062766	51076	3M™ General Purpose Body Filler, 1 L, 51076				Canister
7000062771	51079	3M™ General Purpose Body Filler, 1.65 L, 51079				Each
7000062762	51073	3M™ General Purpose Body Filler, 3 L, 51073				Canister

3M™ Heavy General Purpose Filler

Fill deep dents with 3M™ Heavy General Purpose Filler. Our Heavy General Purpose Filler is a smooth, heavyweight general purpose body filler that works with all mainstream paint systems and can be used for a range of applications and temperatures.

- Get a very easy to sand filler
- Use with all mainstream paint systems
- Easy to spread

Product ID	Part Number	Product	MOQ	Order Unit		SU
7000062764	51075	3M™ Heavy General Purpose Filler, 1 L, 51075				Canister
7000062770	51078	3M™ Heavy General Purpose Filler, 1.65 L, 51078				Each
7000062761	51072	3M™ Heavy General Purpose Filler, 3 L, 51072				Canister

Coatings & Fillers

3M™ Hardener for Body Filler

3M™ Hardener for Body Filler is a peroxide hardener and can be used with for most types of 3M Bodyfillers.

- Peroxide Hardener
- Usual mixing ratio with filler 2-3% by weight
- Available in tubes or cartridges to fit the filler system

Product ID	Part Number	Product	MOQ	Order Unit		SU
7000062768	51077	3M™ Hardener for Body Filler, 40 g, 51077		Each		
7000062772	51080	3M™ Hardener for Body Filler, 55 g, 51080		Each		
7000062763	51074	3M™ Hardener for Body Filler, 100 g, 51074		Each		

3M™ Plastic Filler

Use our 3M™ Plastic Filler as a more flexible alternative to standard polyester fillers, for bumpers and plastic materials. Our 2K polyester filler is supplied as a kit, including hardener. It's easily applied and cures to create a surface for easier and improved sanding.

- Easy to mix and to apply
- More flexible filler than standard polyester fillers
- Easy to sand

Product ID	Part Number	Product	MOQ	Order Unit		SU
7000095200	51009	3M™ Plastic Filler, 0.5 kg can, 51009		Canister		

Focus

3M™ FC Epoxy Metal Filler

3M™ FC Epoxy Metal Filler is a fast curing filler for all metall substrates (steel, alu...) to fill deeper dents, shape and modell structures of the surface and provide corrosion protection for welded seams.

- Lead-free alternative to tin soldering
- Ideal for modelling / forming difficult to access areas
- Excellent corrosion protection

Product ID	Part Number	Product	MOQ	Order Unit		SU
7100276633	37455	3M™ FC Epoxy Metal Filler, 180 ml, 37455				
7100276634	37455	3M™ FC Epoxy Metal Filler, 180 ml, 37455		Each		

PERSONAL SAFETY

• Comfort Particle Mask P2

• Hearing Protection

• Comfort Goggles

• Reusable Workwear

• Safety Gloves

► Perform initial sanding using a handblock in order to spot high and low spots on the repair area

► Mark the deepest points in the damaged area in order to place welding points

Tip: Don't remove the paint completely from the damaged area as this will allow you to better complete the dent pulling process and reduce the likelihood of causing holes in the substrate

► Remove paint/coating in the low points of the repair area, in preparation for dent pulling

► Spot weld onto the repair area using your preferred and recommended method and/or equipment

Note: Always ensure that the equipment is properly calibrated depending on the materials being repaired

► Pull the spots of dent using preferred dent pulling method and equipment

Tip: To avoid surface imperfections or pinholes in the substrate, aim to distribute the load across the repair area

► Spot removal by rotating the welded spot manually

Note: This modern method will reduce the likelihood of causing holes in the substrate and avoid the thin out of the substrate due to a coarse sanding step for the removal

► Sanding down the job area to bare metal

► Switch to ROTEX motion for high abrasion first

► For fine sanding step switch to ROTEX orbital random motion, without changing the sanding disc or grit!

Note: For aluminium substrates, always use a pneumatic sanding tool such as Festool Automotive Systems LEX 3 150/7 and follow instructions of ATEX directive 94/9/EG for Zone 22 areas

► Degrease the surface

► Apply enough 3M™ FC Epoxy Metal Filler for dent filling

► Recommended settings for applicators: pneumatic max. inlet pressure 5.5 bar / battery driven 3kN, max speed 180mm/min.

Note: A new cartridge needs to be equalised before the first application to ensure thorough mixing of the product. After the first use, no further equalisation is necessary

► The curing of 3M™ FC Epoxy Metal Filler can be accelerated using IR drying after the initial gelling period. Wait 10 minutes before using an IR dryer to heat for 10-20 minutes with a panel temperature of 70 °C

► Airdrying: sandable ~ after 4 h @ 22 °C ambient temperatures

► Tip for use: warming up the material & surface to ~30°C before material application will help to accelerate curing, particularly at cold ambient temperatures

► 3M™ Cubitron™ II 80+ - 120+.

► To remove coatings more quicker, use the ROTEX motion setting

► To refine previous sanding scratches, switch to ROTEX orbital random motion, keeping the previous abrasive disc on the machine

Tip: Pre-sanding step can also be done by using traditional body files if necessary

► Thoroughly degrease the surface

► Apply a further layer of 3M™ FC Epoxy Metal Filler if necessary and repeat drying and sanding steps as recommended in the previous steps

► Maximum finished thickness should not exceed 4-6 mm, maximum layer thickness should not exceed 2-3 mm

► Follow car manufacturer and paint company recommendations for subsequent steps

Coatings & Fillers

3M™ Platinum™ Plus Glaze

3M™ Platinum™ Plus Glaze is a fine, easy to spread smooth finishing putty for cosmetic repair or as final step of the filler process.

- Can be sanded within 15 mins
- Stain and tack free
- Self-levelling formula

Product ID	Part Number	Product	MOQ	Order Unit		SU
7100099841	31180	3M™ Platinum™ Plus Glaze, 887 ml, 31180		Bottle		

3M™ Premium Glaze

3M™ Premium Glaze can fill small surface imperfections or sanding scratches, and reduce primer use. Our finishing glaze adheres well to most substrates and is ideal for the automotive aftermarket.

- Easy to spread
- Fast to cure
- Fill pinholes and sanding scratches

Product ID	Part Number	Product	MOQ	Order Unit		SU
7100023685	51212	3M™ Premium Glaze, Kit, 910 ml, 51212		Bottle		

3M™ Acryl Putty

3M™ Acryl Putty are auto body repair putties designed with very easy sanding and fast drying characteristics for use in filling small pinholes and scratches.

- Fast drying
- Easy sanding
- Use for filling pinholes and scratches

Product ID	Part Number	Product	MOQ	Order Unit		SU
7000094976	05423	3M™ Acryl Putty, Green Spot Putty, 200 g, 05423				
7000028276	05096	3M™ Acryl Putty, Green Spot Putty, 410 g, 05096		Each		
7000045481	05098	3M™ Acryl Putty, Red Glazing Putty, 410 g, 05098		Each		

3M™ Multipurpose Body Filler

3M™ Multipurpose Body Filler is a standard polyester filler with good filling properties for a wide range of automotive body repairs.

- Get short curing time
- Use for good adhesion properties
- For most dent filling jobs on metal in the autobody repair

Product ID	Part Number	Product	MOQ	Order Unit		SU
7010045910		3M™ Multipurpose Body Filler, 51314				

Coatings & Fillers

Foam fillers

3M™ Flexible Foam

Two part urethane which foams in place; designed to replace flexible foams found in OEM applications such as trunks, door cavities, door skins, roof beams, etc.

- A high performance two component flexible urethane closed-cell foam
- Designed to replace flexible foams found in OEM anti-flutter applications such as intrusion beams, roof bows, hood webbing, etc
- 40 second work time

Product ID	Part Number	Product	MOQ	Order Unit	SU

Focus

3M™ Cavity Wax Plus

3M™ Cavity Wax Plus is a non-hardening corrosion protective coating for bare or primed aluminum and steel automotive inner body panels and welded structural components. The material is designed to cover and seal interior joints, hem flanges and compromised e-coats where corrosion can form. Properly applied with the 3M™ Cavity Wax Plus Wand Kit, it remains pliable and will not chip, peel or crack.

- Corrosion protection for inner body panels, frame rails and structural enclosures
- Formulated for bare or primed automotive metals such as steel and aluminum
- Spray-on material provides consistent and uniform protection

Product ID	Part Number	Product	MOQ	Order Unit		SU
7100260106	08852	3M™ Cavity Wax Plus, 500 ml, 08852				

3M™ Inner Cavity Wax

Get long lasting rust proofing with 3M™ Inner Cavity Wax.

3M™ Inner Cavity Wax – Amber will seep into gaps and along welded joints for excellent rust proofing. Use as an aerosol or with an applicator gun.

3M™ Inner Cavity Wax - Transparent has a heavy consistency and is usually used for engine compartment areas or where you like to protect accessible bare metal parts, i.e. use it for areas where capillary action is not required.

- Easy to use
- Quick to apply
- Convenient inner rust protection

Accessories and Organisation

3M™ Wall dispenser for Body Filler

Accurately dispense body filler and hardener with 3M™ Wall Dispenser for Body Filler. Our robust wall mounted dispenser holds large (1.65 litre) cartridges and dispenses the exact required amount of filler and hardener, for mixing in the right ratio. Ratio can be adjusted as needed to fit body shop conditions.

- Adjust the hardener to filler ratio
- Dispense the amount needed with just one press
- Easy to mount cartridges

Product ID	Part Number	Product	MOQ	Order Unit		SU
7000062777	51081	3M™ Wall dispenser for Body Filler, for 1.65 L cartridges, 51081				Each

3M™ Dynamic Mixing System Applicator Rack

Store the Dynamic Mixing System (DMS) applicator safely with 3M™ Dynamic Mixing System Applicator Rack. Our robust, metal rack can be mounted on a wall or a trolley.

- Robust metal construction
- Store Dynamic Mixing System (DMS) applicator safely
- Use to hold DMS applicator when not in use

Cleaning Supplies

Cloths & Wipes

3M™ Paintshop Handwipes

Use 3M™ Paintshop Handwipes to quickly clean hands of wet and dry paints, grease, sealants, adhesive and oil. Our wipes are infused with a moisturiser to help protect skin.

- Removes most wet and dry paints, oils, sealants and adhesives
- Contains skin conditioner
- Double layered, textured material creates gentle scrubbing effect and excellent absorbency

Product ID	Part Number	Product	MOQ	Order Unit	MSU	SU
7000083683	80347	3M™ Paintshop Handwipes, 100, 80347		Each		

3M™ Perfect-It™ Polishing Wipe

Use 3M™ Perfect It™ Polishing Wipe with 3M™ Perfect It™ polishes, for wiping residual polish and compound from panels. Our polishing wipe is soft, supple and highly absorbent. It's low linting for static-free cleaning.

- Get static free wiping thanks to low linting wipe
- Wipe residual polish and compound from panels
- Tear resistant even when wet

Product ID	Part Number	Product	MOQ	Order Unit	MSU	SU
7100198422	34568	3M™ Perfect-It™ Polishing Wipe, 320 mm x 400 mm, 34568		Carton		

3M™ Panel and Polishing Wipe Dispenser

3M™ Panel and Polishing Wipe Dispenser is a wall mountable dispenser to hold either a 3M™ Panel Wipe or 3M™ Polishing Wipe Carton.

- Robust metall construction
- Wall mountable
- Holds Wipes cartons

Product ID	Part Number	Product	MOQ	Order Unit	MSU	SU
7000070284	50481	3M™ Panel and Polishing Wipe Dispenser, 50481				

3M™ Perfect-It™ Ultra Soft Cloth

Use our high performance 3M™ Perfect-It™ Ultra Soft Cloth to wipe away residue, dust, dirt and fingerprints, without leaving scratches. Use on a wide range of surfaces including glass, metal, chrome, vinyl and leather.

- Wipe away residues, dirt, dust and fingerprints quickly and easily
- Use a non-scratching low linting cloth
- Resistant to chemicals

Product ID	Part Number	Product	MOQ	Order Unit	MSU	SU
7000032157	50486	3M™ Perfect-It™ Ultra Soft Cloth, Blue, High Performance, 50486		Each		
7000032156	50400	3M™ Perfect-It™ Ultra Soft Cloth, Yellow, High Performance, 50400		Each		

Cleaning Supplies

3M™ Polish Rosa Ultra Soft Polishing Cloth

Use 3M™ Polish Rosa Ultra Soft Polishing Cloth with 3M Polish Rosa, to achieve a blemish and haze-free finish and an exceptional high gloss result.

- Use with 3M Polish Rosa
- Get a blemish and haze free result
- Microfibre cloth

Product ID	Part Number	Product	MOQ	Order Unit	MSU	SU
7000032158	50489	3M™ Polish Rosa Ultra Soft Polishing Cloth, Pink, 50489		Each		

3M™ Professional Panel Wipes

3M™ Professional Panel Wipes are heavy duty, highly absorbent wipes for all tasks in the body and paint shop.

- Use strong wipes with excellent absorbency
- Apply to any heavy duty task thanks to super strength when wet or dry
- Get low-linting anti-static wipes

Product ID	Part Number	Product	MOQ	Order Unit	MSU	SU
7100255705	34567	3M™ Professional Panel Wipes, 300 mm x 400 mm, 34567		Carton		

3M™ Tack Cloth

Remove dirt, lint, dust and sanding particles with 3M™ Tack Cloth. Our cloth is excellent for clean-up in the pre-painting process, working on a variety of materials including metal, plastic, fiberglass and wood. Even with repeated use, it stays soft and dry.

- Remove dirt, lint, dust and sanding particles
- Clean a wide variety of materials in the pre-painting process
- Get less adhesive transfer to the hands

Product ID	Part Number	Product	MOQ	Order Unit	MSU	SU
7100200387	50401	3M™ Tack Cloth, Aqua, 320 mm x 400 mm, 50401		Bag		
7000038363	09660	3M™ Tack Cloth, White, 320 mm x 400 mm, 09660				

3M™ Tack Pad

3M™ Tack Pad leaves no drag marks behind as dust is drawn into the tack pad. Our tack pads leave hands less sticky due to the reduction of adhesive transfer.

- Hands are less sticky due to the reduction of adhesive transfer
- Leaves no drag marks behind
- Smooth transition for spraying primers, base coat or clear coat paints

Product ID	Part Number	Product	MOQ	Order Unit	MSU	SU
7100193601	07910	3M™ Tack Pad, 175 mm x 235 mm, 07910		Each

Cleaning Chemicals

3M™ Perfect-It™ Boat Wash

3M™ Perfect-It™ Boat Wash is an important first step in achieving a truly professional gelcoat finish. This high-suds formula works without stripping wax, removing grime, algae, dirt and other common marine contaminants to create a clean, clear surface for refinishing. In fact, it works on every boat surface from bow to stern.

- Use alone for general cleaning, or as the first step in 3M™ Perfect It™ gelcoat finishing system
- High-suds formula removes common marine debris without stripping wax from the surface
- Can be used on virtually all areas of boats from bow to stern, including hull and non-skid areas

Paint Application Systems

Your paint booth is not just where you earn your living. It's where you prove yourself, and the value of your entire shop, every single day. As an industry leader in paint application equipment, 3M continues to innovate and change the way you apply paint and other coatings.

3M™ Performance Spray Gun

Game-changing interchangeable nozzle technology delivering liquid material efficiency, increased productivity with a premium finish.

As every painter knows, once paint has been mixed, it's sold. You either use it or lose it, which can cut into your bottom line. What if we told you mixing less paint yet getting the same or better coverage was possible?

With the 3M™ Performance Spray Gun that possibility can become reality. It's superior transfer efficiency, with up to 26% less material waste* than leading metal spray guns**, all in the palm of your hand. Don't cut down on your efficiency – start spraying the smart way.

* Using HVLP atomising heads

** Maximum transfer efficiency varies by spray gun type and settings.

Why work harder when you can just work smarter?

High Transfer Efficiency

To prove the superior transfer efficiency of the 3M™ Performance Spray Gun, we sent it to Fraunhofer Institute for Manufacturing and Automation IPA, Stuttgart, DE. They conducted transfer efficiency testing according to the DIN EN ISO 13 966-1 test method. Transfer efficiency equates to the amount of material (paint) effectively used on the job. A higher transfer efficiency rating means less material is wasted, which in turn could save you money. And it can mean a cleaner paint booth due to less overspray, which can also pose potential cross-contamination.

Fraunhofer tested the 3M™ Performance Spray Gun against a range of industry-leading premium spray guns. The results showed a high **78% transfer efficiency** while spraying automotive base coat, exceeding the other leading metal spray guns tested.

The EN 13966-1 standard defines a reproducible laboratory procedure for transfer efficiency measurements. It is used by manufacturers to enable a reliable comparison of spraying equipment.

+ The 3M™ Performance Spray Gun falls within HVLP requirements up to an inlet pressure of 1.38 bar (Gravity fed).

Spray Gun Transfer Efficiency*

Tests conducted using PPG Envirobase with 1.3 mm nozzle with four of the leading metal spray guns.

* Inlet pressure settings in line with HVLP+ requirements from each manufacturer.

Transfer efficiency measured according to independent testing by Fraunhofer Institute, Germany.

Replaceable atomising heads – now available as HVLP and Fine Finish nozzles

The secret lives inside our advanced interchangeable nozzle technology. With a range of fine finish and HVLP sizes, each atomising head is optimised for consistent atomisation and superior transfer efficiency – across a full range of high performance coatings.

Spray solid colours, metallics, pearls, clear coats, sealers, primers and more with the same premium performance you expect from your best spray gun.

And every time you swap out the replaceable nozzle for a fresh one, you can expect like-new spray performance.

TIPS:

- ✓ Store 3M™ Performance Spray Gun with a clean nozzle
- ✓ Change nozzles regularly to maintain like-new performance
- ✓ Move up or down one size if material flow is too low or high
- ✓ Dispose in accordance with your local regulations

PERSONAL SAFETY

• Reusable Respirators with full face protection

• Reusable Coveralls

• Nitrile Gloves

Requirements for Best Results and Quality

- ▶ Apply Dirt Trap Protection Film in order to keep a clean environment in the spray booth.
- ▶ Use 3M Aircare ACU-03 to obtain proper pressurized air.
- ▶ Use 3M Protective Coveralls to protect the operator and get a cleaner job.

Determination of Colour

- ▶ Use 3M™ Perfect-It™ Fast Cut Plus Extreme to restore original surface condition for an accurate colour match.
 - ▶ If you are using the latest spectrometer technology, it is recommended to do an additional polishing step after 3M™ Perfect-It™ Fast Cut Plus Extreme with 3M™ Perfect-It™ Ultrafine SE (blue cap).
- Tip: The creation of a personal colour library will make life easier for you in the future as you can reuse your own sprayout cards.

1 Mixing of Base Coat

- ▶ Four 3M™ PPS™ Series 2.0 sizes are available to suit the most common repairs sizes in your shop.
 - ▶ By using 3M™ PPS™ Series 2.0 no additional mixing cup is needed.
 - ▶ As the filter is directly integrated to the 3M™ PPS™ Series 2.0 lid, no additional filtering stage is required.
- Note: Selecting the right size 3M™ PPS™ Series 2.0 Spray Cups for your needs, will reduce the chance of overmixing.

2 Setup 3M™ Performance Spray Gun

- ▶ Pull the trigger back
- ▶ Making sure locking collar is in the “+ configuration”
- ▶ Slide the atomizing head over the fluid needle and push towards the spray gun body
- ▶ Secure the atomizing head by rotating the retainer ring, clockwise until the retainer ring tabs are locked in the “X configuration”
- ▶ HVLP max inlet pressure 1.38 bar (20 psi)
Fine Finish Operating Pressure 2.0 bar (29 psi)
- ▶ The Operating Pressure Range is 0.5 bar (7 psi) – 2.6 bar (37 psi) max

3 Base Coat Application

- ▶ Degrease the surface using paint company or other recommended product. Always follow the manufacturer's instructions.
- ▶ Clean the surface prior to base coat application with tack cloth.
- ▶ Always follow paint company recommendations regarding basecoat application process.
- ▶ When finished spraying, disconnect the air line, invert the spray gun, pull the trigger and gently tap 3M™ PPS™ Series 2.0 Lid and Liner on a surface to help break surface tension of liquid and allow it to flow back into liner.

4 Mixing of Clear Coat

- ▶ Four 3M™ PPS™ Series 2.0 sizes are available for the most common size repairs in your shop.
- Note: Modern clear coat technology should be mixed on demand, due to short pot life! Select the right size 3M™ PPS™ Series 2.0 Spray Cups for your needs, reducing the chance of over applying or wasting clear coat.

5 Clear Coat Application

- ▶ Always follow paint company recommendations regarding clearcoat application process.
 - ▶ 3M™ PPS™ Series 2.0 reduces cleaning time considerably and lowers your solvent consumption.
- Tip: Consult paint or solvent Safety Data Sheets (SDS) in addition to local regulations or authorities for safe use and proper disposal.

6 Cleaning 3M™ Performance Spray Gun

- ▶ Pull the trigger back
- ▶ Rotate the locking collar counter-clockwise and pull the atomizing head away from the gun body
- ▶ Clean the needle with solvent on a cloth.
- ▶ Simply put on the new nozzle and you're done
- ▶ 3M™ Performance Spray Gun & PPS™ reduce cleaning time considerably and lower your solvent consumption.

7 Forced Drying

- ▶ Please do observe the recommendations of your paint manufacturer concerning: object temperature & drying time.
- Note: The quality of drying has a positive influence on the later finishing properties of the surface. Forced drying accelerates the finish process and at the same time ensures an even drying of the paint. A clear coat, which has hardened evenly and well can be finished a lot easier.

PERSONAL SAFETY

• Reusable Respirators

• Comfort Goggles

• Reusable Overall

• Nitrile Gloves

Preparing the Vehicle

- ▶ Vehicle roughly masked.
- ▶ Surface prepared for primer application.

3M™ Smooth Transition Tape

3M™ Soft Edge Foam Masking Tape PLUS

Cleaning of the Surface

- ▶ Degrease the surface using paint company or other recommended product. Always follow the manufacturer's instructions.
- ▶ Clean the surface prior to primer application with tack cloth.

3M™ Tack Cloth

3M™ Professional Panel Wipes

1 Mixing Primer

- ▶ Four 3M™ PPS™ Series 2.0 sizes allow for on demand mixing of the primer.
 - ▶ By using 3M™ PPS™ Series 2.0 no additional mixing cup is needed. Refilling of the primer into the primer gun is not necessary.
 - ▶ As the filter is directly integrated to the 3M™ PPS™ Series 2.0 lid, no additional filtering stage is required.
- Tip: Always use the primer shade recommended by your paint manufacturer! 3M™ PPS™ Series 2.0 allows a quick change between different primer shades.

3M™ PPS™ Series 2.0 Spray Cup System Kit Large 850ml, Standard 650ml, Midi 400ml, Mini 200ml

3M™ PPS™ Series 2.0 UV Kit

3M™ PPS™ Lid & Liner Dispensers

2 Setup 3M™ Performance Spray Gun

- ▶ Pull the trigger back
- ▶ Making sure locking collar is in the "+ configuration"
- ▶ Slide the atomizing head over the fluid needle and push towards the spray gun body
- ▶ Secure the atomizing head by rotating the retainer ring, clockwise until the retainer ring tabs are locked in the "X configuration"
- ▶ HVLP max inlet pressure 1.38 bar (20 psi)
Fine Finish Operating Pressure 2.0 bar (29 psi)
- ▶ The Operating Pressure Range is 0.5 bar (7 psi) - 2.6 bar (37 psi) max

3M™ Performance Spray Gun

3M™ Performance Gravity HVLP Atomising Heads 0.9, 1.2, 1.3, 1.4, 1.6, 1.8, 2.0

3M™ Performance Gravity Fine Finish Atomising Heads 1.2, 1.3, 1.4

3 Primer Application Layer 1

- ▶ 3M™ PPS™ Series 2.0 allows the spray gun to be used upside down without leakage from the cup unlike a traditional vented hard cup.
- ▶ Edges and wheel arches can thus be coated safely.
- ▶ Always follow paint company recommendations regarding primer layer thickness.
- ▶ Modern primer technologies have reduced pot lives. Using freshly mixed primer with every application - avoids the possibility of subsequent shadow effects (curly Q's shows after solvent has fully evaporated) and - therefore considerably reduces the subsequent sanding work.

3M™ PPS™ Series 2.0 Midi, 400 ml

3M™ PPS™ Series 2.0 Mini 200 ml

3M™ PPS™ Lid & Liner Dispensers

4 Primer Application Layer 2

- ▶ A clean gun guarantees a finer coating.
- ▶ A finer coating ensures that the primer lays down flat.
- ▶ This ensures a smoother primer. A smooth primer allows for time and work savings in the process of primer sanding.
- ▶ Using 3M™ Performance Spray Gun & PPS™ Series 2.0 for primer application gives an advantage for the next process step.
- ▶ Note: A poorly maintained primer gun = a rough spray pattern.

3M™ PPS™ Series 2.0 Spray Cup System Kit Large 850ml, Standard 650ml, Midi 400ml, Mini 200ml

3M™ PPS™ Series 2.0 UV Kit

3M™ PPS™ Lid & Liner Dispensers

5 Cleaning 3M™ Performance Spray Gun

- ▶ Pull the trigger back
- ▶ Rotate the locking collar counter-clockwise and pull the atomizing head away from the gun body
- ▶ Clean the needle with solvent on a cloth.
- ▶ Simply put on the new nozzle and you're done
- ▶ 3M™ Performance Spray Gun & PPS™ Series 2.0 reduce cleaning time considerably and lower your solvent consumption.

3M™ Professional Panel Wipes PN 34567

Forced Drying

- ▶ Always follow paint company recommendations on the following:
 - ▶ Object temperature.
 - ▶ Drying time.
 - ▶ Distance of the heater from the object.
- ▶ The quality of drying influences the sanding properties of the primer. Forced drying accelerates the repair process and at the same time ensures an even drying of the primer. A primer that has hardened evenly and fully is a lot easier to sand.

Paint Application Systems

Sprayer Systems

Focus

3M™ Performance HVLP Spray Gun System with PPS™ 2.0

3M™ Performance Spray Gun is one of the first ever spray guns designed specifically to save you time while delivering top-of-the-line performance. Its integrated system includes quick-change replaceable atomizing heads and 3M™ PPS™ Series 2.0 Spray Cups, which makes for faster clean-up, changeovers and cycle times. HVLP nozzles come in sizes from 0.9 to 2.0 to spray a full range of high-performance automotive coatings with the high transfer efficiency, consistent atomization and large fan pattern you expect from a premium spray gun. Engineered from an impact-resistant composite material reinforced with stainless steel, 3M™ Performance Spray Gun is one of the lightest spray guns in the industry — all while maintaining the power and performance you expect as a professional painter.

- Precision spray performance with high transfer efficiency and large, adjustable fan pattern
- Faster clean up and change overs that can help improve your cycle times
- Quick-change, replaceable atomizing heads connect directly to 3M™ PPS™ Series 2.0 Spray Cup System

3M™ Performance Spray Gun Ball Valve

3M™ Performance Spray Gun Ball Valve is an accessory for the 3M™ Performance Spray Gun System configured as a pressure feed sprayer. The valve gives the spray gun operator the ability to stop the flow of paint from the pressure source (pot or pump) at the spray gun end of the supply hose. Recommended for use when the painter does not have easy access to the pressure source. Light and easy to use.

- Ball valve lets the painter stop fluid flow to spray gun
- Attaches between whip hose and supply hose in a pressure feed configuration
- Seals are compatible with both solvent-based and waterborne coatings

Product ID	Part Number	Product	MOQ	Order Unit	MSU	SU

Paint Application Systems

3M™ Performance Spray Gun Pressure Whip

The 3M™ Performance Spray Gun Pressure Whip Hose connects to the 3M™ Performance Spray Gun for use in pressure feed applications. Provides a fast connection between the atomizing head and the pressurized paint supply hose. Securely fastens to the spray gun base for better balance and hose control. Can be used with optional ball valve to control paint from the pressure line.

- Helps quickly convert Performance Spray Gun between gravity and pressure fed systems
- Securely fastens to spray gun base for better balance and hose control
- Quick connection to 3M™ Performance Pressure HVLP Atomizing Heads for easy assembly or replacement

3M™ Performance Spray Gun Rebuild Kit

The 3M™ Performance Spray Gun Rebuild Kit provides the replacement parts needed for rebuilding the 3M™ Performance Spray Gun. Includes exterior replacement parts as well as all required interior seals, springs, screws and parts. Instruction manual provides specific details on how to rebuild.

- Includes everything needed to rebuild, including all fasteners
- Refresh trigger pull, needle, fan and fluid control with new springs and seals
- Use only with 3M™ Performance Spray Gun

3M™ Performance Spray Gun Whip Pin

3M™ Performance Spray Gun Whip Pin is a replacement attachment pin for the 3M™ Performance Spray Gun Pressure Whip Hose. The clevis pins are used to secure the whip hose to the body of the 3M™ Performance Spray Gun. The connection helps give the painter additional control and helps prevent the atomizing head from twisting and unwanted stress.

- Pin securely attaches whip hose to 3M™ Performance Spray Gun
- Package contains 4 steel ball detent clevis pins
- Smooth steel construction inserts into and out of whip hose attachment bracket

3M™ Performance Spray Gun H/O Conversion Pack

Get more application control of heavy or texture coatings with our 3M™ Performance Spray Gun H/O Conversion Pack for the 3M™ Performance Spray Gun. When used with a 3M™ PPS™ Series 2.0 Type H/O Pressure Cup, this upgrade lets technicians spray thick, high-viscosity coatings with better control of texture, pattern size, and delivery rate than aerosol cans and Body Schutz guns.

- Upgrades 3M™ Performance Spray Gun to spray heavy, thick coatings using 3M™ PPS™ Series 2.0 H/O pressure cups.
- Provides excellent application control of heavy or texture coatings.
- Easy-to-install kit adds a port for connecting the pressure cup's air supply tube to the gun body.

3M™ Performance Spray Gun Locking Collar

The unique 3M™ Performance Spray Gun Locking Collar helps ensure a solid connection between the 3M™ Performance Spray Gun and 3M™ Performance Atomizing Heads. The locking collar is easy to use, allowing for quick nozzle changes while switching between paints and coatings or for cleanup at the end of a job. The easy-grip tabs make it easier to turn the locking collar.

- Securely attaches 3M™ Performance Atomizing heads to 3M™ Performance Spray Gun
- Easy grip tabs for coupling and uncoupling of atomizing heads
- Built from a durable polymer material

3M™ Accuspray™ Atomising Heads

3M™ Accuspray™ Atomising Heads are designed specifically for use with 3M™ Accuspray™ Spray Guns. This selection of replaceable heads makes for the incredibly fast, efficient application of low-, medium- and high-viscosity materials from one gun. Technicians simply remove and replace the head for the performance of a new spray gun on demand. See-through heads are easily cleaned and reused. Not compatible with 3M™ PPS™ Series 2.0 items.

- Selection of replaceable atomising heads for application of very low- to high-viscosity coatings
- Fast, simple head replacement – the performance of a brand new spray gun on demand
- See-through design makes it easy to see when the heads are clean

Engineered for peak performance.

3M™ PPS™ Series 2.0 is our most advanced Spray Cup System. It's packed with features to help you perfect your paint jobs.

Domed Lid with Full-Diameter Filter.
More paint below the filter improves flow and consistency, while reducing spitting from start to finish.

New Cup in Every Lid and Liner Kit
Start with a clean cup more often, reducing paint build-up. On-cup ratios and fill markings eliminate traditional mixing cups.

Sealing Plug Included
Allows you to seal and protect coatings upside down with greater stability when not in use. Use fewer lids by keeping filters wet.

3

1

Wide Spout Adapter with Four-Point Connection
Maximizes stability while spraying. Makes cleaning easier.

4

2

Quarter-Turn Lid Locking System
Comes with every lid. Stays cleaner. Locks faster. Fewer parts to keep track of.

6

5

Access Window
Allows painter to hold the liner for cleaner, easier lid removal when refilling. Also easier to check paint levels.

3M™ PPS™ Series 2.0 Spray Cup System

Choose the cup that fits the job.

Four sizes. Two filter options. H/O pressure cups for high viscosity materials. And opaque kits for UV coatings. You can have an unrivalled selection at your fingertips. And with 3M™ PPS™ Series 2.0 Adapters, they're compatible with nearly every spray gun on the market.

Paint Application Systems

3M™ PPS™ Cup & Collar

Use our hard 3M™ PPS™ Cup & Collar range to support and hold 3M™ PPS™ flexible liners in the Paint Preparation System (PPS™). It's available in four sizes and allows the painter to measure, mix filter and spray paint materials easily.

- Hard cups and collars support liners for the 3M™ Paint Preparation System, PPS™
- 3M™ PPS™ is an all-in-one disposable solution for measuring, mixing, filtering, and spraying of paint materials
- System enables the painter the ability to consistently spray at 90° to the part, no matter the part orientation (even upside down)

3M™ PPS™ Adapter

3M™ PPS™ Adapter converts paint spray guns for use with the 3M™ Paint Preparation System (PPS™). Specifically designed adapters, allows Painters to use the PPS™ with virtually any spray gun model. To use this adapter, remove the existing spray gun cup. Then simply thread the correct PPS™ adapter into the Spray Gun.

- Adapter converts typical spray guns into ones that work with the 3M Paint Preparation System (PPS™)
- Specifically designed adapters, allows Painters to use the PPS™ with virtually any spray gun
- Stainless Steel adapter offers exceptional durability

3M™ PPS™ Type V Lid & Cup Kits

3M™ PPS™ Type V Lid & Cup Kits features disposable vented cups and lids for collision repair professionals who prefer vented systems for paint prep and spray. The kits contain 50 cups and lids and are available in 2 sizes (Standard with 700 ml volume cups and Midi with 400 ml volume cups). Pre-assembled valve assemblies and lids with pre-welded filters reduce setup time.

- For professional painters who prefer vented paint cups
- Midi 400 ml size is ideal for spot, 1-panel and 2+-panel repairs
- Standard 700 ml size is ideal for most 3+-panel repairs

Paint Application Systems

3M™ PPS™ Type V Lids

3M™ PPS™ Type V Lids feature disposable lids for the 3M™ PPS™ Type V System, ideal for collision repair professionals who prefer vented systems for paint prep and spray. The lids are available with 2 filter sizes - 125 micron, recommended for waterbased paints and 200 micron. The 3M™ PPS™ Type V Lids fit both cups sizes (400 ml and 700 ml). Pre-welded filters reduce setup time.

- For professional painters who prefer vented paint cups
- Connect with a suitable 3M™ PPS™ adapter to the chosen paint gun or directly to any 3M™ Accu-spray™ gun.
- Lids feature pre-welded 200 micron for solventborne or 125 micron filters for waterborne paint systems

Product ID	Part Number	Product	MOQ	Order Unit	MSU	SU

Finishing Products

Each time a vehicle rolls out of the shop, it's a chance to showcase your passion for automotive refinishing. You've worked to ensure the vehicle has been prepped, painted, and polished back to the way it was when it came in. But to your customer, it's now somehow even better, more exciting — like it was when it was brand new. This is among most powerful endorsements you can deliver for your collision repair operation, and it represents the full potential of your paint shop.

Important note on process safety
Always wear Personal Protective Equipment

• Comfort Particle Mask P3

• Hearing Protection

• Comfort Goggles

• Reusable Overall

• Safety Gloves

Select Step 1a, 1b or 1c based on the size of your repair. Then continue on to Step 2 (Compound) and Step 3 (Polish).

<p style="writing-mode: vertical-rl; transform: rotate(180deg);">Sanding Spot Defects</p>	<p>1a</p>	<ul style="list-style-type: none"> ▶ Denib with 3M™ Finesse-it™ Trizact™ A5 Disc, grade 3000 on denib tool ▶ Refine scratches with 3M™ Trizact™ Foam Disc, grade 8000, 75 mm on orbital sander. ▶ Proceed directly to Polish Step. 	
<p style="writing-mode: vertical-rl; transform: rotate(180deg);">Sanding Small Area Defects</p>	<p>1b</p>	<ul style="list-style-type: none"> ▶ Sand the area with a 3M™ Hookit™ Purple Finishing Film Abrasive Disc 260L, grade P1500, 3" (75 mm). Use disc with a soft interface pad. Remove all panel defects and match texture to adjacent OEM panels. Wipe panel clean. ▶ Refine scratches with a dual action sander and a 3M™ Trizact™ Foam Disc, grade 3000, 3" (75 mm). Use disc damp with a soft interface pad. Sand each area 4-6 times. ▶ Wipe panel clean. If scratches are still visible, continue refining. 	
<p style="writing-mode: vertical-rl; transform: rotate(180deg);">Sanding Large Area Defects</p>	<p>1c</p>	<ul style="list-style-type: none"> ▶ Sand the area with a 3M™ Hookit™ Purple Finishing Film Abrasive Disc 260L, grade P1500 - P2000, 6" (150 mm). Use disc with a soft interface pad. Remove all panel defects and match texture to adjacent OEM panels. Wipe panel clean. ▶ Refine scratches with a dual action sander and a 3M™ Trizact™ Foam Disc, grade 3000, 6" (150 mm). Use disc damp with a soft interface pad. Go over each area 4-6 times. ▶ Wipe panel clean. If scratches are still visible, continue refining. 	
<p style="writing-mode: vertical-rl; transform: rotate(180deg);">Compound</p>	<p>2</p>	<ul style="list-style-type: none"> ▶ Apply the compound to the pad in a circular motion by using the cap from the bottle to help spread a small amount of compound throughout the pad. When applying compound to a new pad, its recommended starting at speed setting 1 for a few seconds, to ensure the pad is loaded evenly with compound before starting the task. ▶ Set the pad flat on the surface and start at speed setting 4 to spread compound, increase speed as necessary. Apply minimal down pressure in a north/south, east/west, crosshatch pattern to remove scratches/defects. ▶ Compound small areas at a time. Approximately a 60 cm x 60 cm area is recommended to ensure adequate scratch/defect removal. ▶ Use a 3M™ Perfect-It™ Ultra Soft Cloth - High Performance to remove the residual film from the surface. If scratches/defects remain, apply 4 drops of compound to the pad and continue compounding. ▶ Ensure all sand scratches have been completely removed. Inspect the surface by spraying with 3M™ Perfect-It™ Finish Control Spray and wipe with a clean microfiber cloth. <p>Note: Clean pads often with a conditioning brush for optimal performance.</p>	
<p style="writing-mode: vertical-rl; transform: rotate(180deg);">Polish</p>	<p>3</p>	<ul style="list-style-type: none"> ▶ Apply the polish to the pad in a circle near the edge of the pad. When applying polish to a new pad, its recommended starting at speed setting 1 for a few seconds, to ensure the pad is loaded evenly before starting the task. ▶ Set the pad flat on the surface and start at speed setting 4 to spread polish. Reduce speed as necessary. Apply minimal down pressure in a north/south, east/west, crosshatch pattern to remove swirls/defects. ▶ Polish small areas at time. Approximately a 60 cm x 60 cm area is recommended to ensure adequate swirl/defect removal ▶ Use a 3M™ Perfect-It™ Ultra Soft Cloth - High Performance to remove the residual film from the surface. If swirls/defects remain, apply 4 drops of polish to the pad and continue polishing.

3M™ Perfect-It™ Random Orbital Polishing System

Refinishing.
Redefined.

USE

Introducing the 3M™ Perfect-It™ Random Orbital Polishing System

- A professional grade set of tools, pads and polishes
- Re-engineered for the collision repair industry
- An easy-to-use polishing tool
- Specially formulated liquids and pads
- No more fear of **swirls, burn through**, or other pitfalls common with traditional rotary systems

Its paint finishing, redefined.

3M™ Random Orbital Polisher

- User-friendly, comfortable tool design
- Well-balanced and easy to operate

3M™ Random Orbital Pads

- Single-sided 3M™ Hookit™ pad attachment for easy change-outs
- Compounding and polishing pads available in 5 inch / 130 mm and 6 inch / 150 mm sizes

3M™ Random Orbital Compound and Polish

- Bottle cap colour matches the liquid inside and the pad it should be used with
- Effective on a variety of paint and clear coat finishes

BENEFITS

Consistent Swirl-Free Finish

3M™ Perfect-It™ Random Orbital Polisher **prevents swirl marks**, with our specially designed pads, compound and polish.

Avoid Burn Through and Rework

Experience **no fear of burn through** on your freshly painted panels. No trips back to the booth, no disruptions in cycle time and no loss of confidence on the job.

Designed For All Skill Levels

Whether you're a painter, detailer, novice or seasoned expert, the 3M™ Perfect-It™ Random Orbital Polishing System was designed to help deliver sleek, consistent results.

Random Orbital Paint Finishing Solutions

Random Orbital Process

Ideal for:
- Fresh and old paint
- All clearcoat types
- Full panel repair as well as small areas

				Not Needed (One-less step)

- Reusable Overall
- Safety Gloves

Sanding Spot Defects

- ▶ Denib with 3M™ Finesse-it™ Trizact™ film disc, 32mm grade 3000 on denib tool.

466LA Trizact™ A5 Discs 3000

3M™ Mini Orbital Sander, Air Pressure

- ▶ Refine scratches with 3M™ Trizact™ Fine Finishing Disc 443SA, grade 8000, 75mm on orbital sander.

3M™ Trizact™ Fine Finishing Disc 8000

Festool LEX 3 77

Sanding Area Defects

- ▶ Sand the area with 3M™ Hookit™ Purple Finishing Film Abrasive Disc 260L, grade P1500 - P2000.

3M™ Hookit™ 260L+

Festool LEX 3 150/3

Festool Interface-Pad

- ▶ Refine scratches with 3M™ Trizact™ Fine Finishing Disc 443SA, grade 3000, 150 mm on orbital sander.
- ▶ Refine scratches with 3M™ Trizact™ Fine Finishing Disc 443SA, grade 8000, 150 mm on orbital sander.

3M™ Trizact™ Fine Finishing Disc 3000

3M™ Trizact™ Fine Finishing Disc 8000

Polishing

- ▶ Add a small amount of 3M™ Perfect-It™ 1-Step Finish Material to a purple foam pad on the rotary polisher.
- ▶ Polish in an overlapping pattern with rotary speed: 600 - 1400 rpm.
- ▶ When polishing always try to keep the pad flat on the surface to avoid jumping. Reduce pressure towards the end of the compounding stage to enable easy clean up.

Note: The softer the coating, the lower the temperature and thus the RPM needs to be.

3M™ Perfect-It™ 1-Step Finishing Material

3M™ Perfect-It™ Hookit Convoluted Purple Polishing Foam Pad

3M™ Perfect-It™ Quick Connect Double Sided Purple Convoluted Polishing Foam Pad

3M™ Perfect-It™ Pink High Performance Ultra Soft Cloth Microfiber

Festool SHINEX RAP 150

Control

- ▶ Should sanding scratches from the first polishing step still be visible after controlling the surface, please repeat polishing step!

Note: It's important to ensure that you remove all sanding scratches at this stage, in order to avoid their reappearance at the end of the polishing process.

3M™ Perfect-It™ Finish Control Spray

3M™ Professional Panel Wipes

Fine Polishing

- ▶ Re-Polish the area to ensure a high gloss finish is achieved, with no additional compound onto the foam needed.
- ▶ Polish area and surrounding in an overlapping pattern with rotary speed 600 - 1400 rpm.
- ▶ Keep the polishing pad flat on the surface to ensure an even appearance and glossy finish, reducing pressure towards the end of the polishing step.
- ▶ Wipe off any excess polish and inspect area - most colours are fine now.
- ▶ For critical colours (very dark or black) - remove the holograms with 3M™ Perfect-It™ Ultrafina SE Compound and blue polishing pads.

3M™ Perfect-It™ 1-Step Finishing Material

3M™ Perfect-It™ Hookit Convoluted Purple Polishing Foam Pad

3M™ Perfect-It™ Quick Connect Double Sided Purple Convoluted Polishing Foam Pad

3M™ Professional Panel Wipes

Fine Polishing Step

► Change foam to a yellow foam and add small amount of 3M™ Perfect-It™ Extra-Fine Plus onto the pad.

► Polish area and surrounding in an overlapping pattern with rotary speed 600-1400 rpm

► Processing: keep polishing foam flatly on the surface for glossy finish, reduce pressure towards end of the polishing step.

► Wipe off any excess polish and inspect area - most colours are fine now.

3M™ Perfect-It™ Extra Fine PLUS

3M™ Perfect-It™ Quick Connect Double Sided Convuluted Yellow Polishing Pad

3M™ Perfect-It™ High Performance Cloth

Hologram Removal (Optional)

► Add 3M™ Perfect-It™ Ultrafina SE onto the blue foam pad on the rotary polisher.

► Processing: - polish with reduced speed - moving in an overlapping pattern covering generously the whole area.

► Wipe off polish residues with the extra - soft 3M™ Perfect-It™ High Performance Blue Cloth Ultrafina polishing cloth to avoid generating new micro scratches on the surface.

Tip: Always keep the polishing foam wet (using polish), as this delivers a more even coat of polish on the surface and will prevent the generation of the micro scratches from a dry pad.

3M™ Perfect-It™ Ultrafina SE

Finishing Products

3M™ Perfect-It™ Ultrafine Polishing Pad

Our 3M™ Perfect-It™ Ultrafine Polishing Pad helps to eliminate swirl marks on painted surfaces, even on difficult dark colored cars. Featuring a unique waffle face design that holds liquid polish, this pad applies polish evenly without releasing excess polish that may cause ripples in the finish.

- Get a high gloss shine on dark coloured paint finishes
- Used to help eliminate swirl marks and apply high gloss finishes
- Waffle face provides sufficient contact surface while holding polish well

Masking Films and accessories

Masking films and accessories are part of our full masking systems for great finishes, which can help control dust and overspray, helping keep the paint booth and your work clean.

PERSONAL SAFETY

• Comfort Particle Mask P3

• Comfort Goggles

• Reusable Overall

1 Cleaning of the surface

- ▶ Degrease the surface using paint company or other recommended product. Always follow the manufacturer's instructions.

3M™ Professional Panel Wipes

2 Partly covering of the car

- ▶ Cover the vehicle as soon as possible, this reduces the possibility of contamination from the surrounding environment.

3M™ Purple Premium PLUS Clear Masking Film
4m x 150m,
5m x 120m,
6m x 120m

3M™ Premium Cutter

3 Pre covering

- ▶ Prepare the area for paint application, ensuring sufficient space to allow for smooth transitions and avoid hard edges.
- ▶ Cut the masking film to the appropriate size and attach to the outline masking using 3M masking tapes.

3M™ Soft Edge Foam Masking Tape PLUS

3M™ Trim Masking Tape

4 Roughly covering for primer application

- ▶ For best results, apply 3M™ Smooth Transition Tape on top of the 3M Masking tape to allow a smooth transition of primer edges.

Note: Avoid generating hard edges when primer masking. This generates surface swelling due to the concentration of solvents on the tape edges.

3M™ Smooth Transition Tape

5 Fine covering - preparation for paint application

- ▶ Before applying the base and clear coats, further cut the masking film and attach it to previous contour and aperture masking.
- ▶ Primer sanding.

3M™ Scotch® Masking Tape 3030

3M™ Scotch® Masking Tape 3434

6 Final masking (details) before painting - attaching parts

- ▶ Degrease the surface and adjacent panels as necessary.
- ▶ Mask other areas such as rubbers, trim etc.

3M™ Fine Line Masking Tapes 471+

7 De-masking

- ▶ Removal of masking tapes and film is best done when the car has just left the oven and is still warm.
 - ▶ Always remove Masking tape by pulling at a right angle to the surface. A flatter or sharper angle has a higher risk of leaving adhesive residue on the surface.
- Tip: Using Premium Masking Tapes will pay-off as they have a lower tendency to leave adhesive residue or tape to silver.

Masking Films and accessories

Masking Films

Focus

3M™ Purple Premium Plus Masking Film

Resist moisture imprinting or ghosting on painted vehicle surfaces with 3M™ Purple Premium Plus Masking Film. Our masking film is a premium high density plastic sheeting with superior clinging properties for vehicles.

- Use to resist imprinting and ghosting on painted vehicle surfaces
- High-density, tear-resistant, clear durable film formulated to provide excellent paint overspray adhesion
- Achieve better handling and increase cling to vehicles

Surface Protection Materials

3M™ Dirt Trap Protection Material Applicators

3M™ Dirt Trap Nonwoven Protection Material Applicators are durable, portable equipment for applying 3M™ Dirt Trap Nonwoven Protection Material (white) to paint booths, paint bays and other collision repair shop spaces. Wall and floor applicators hold material rolls securely and roll smoothly as material is applied, and can be pushed and pulled without disassembly for fast and efficient application.

- Quickly applies 3M™ Dirt Trap Protection Material to floors and walls for cleaner, brighter work areas
- Material rolls load quickly with simple clamp motion
- Smooth-rolling applicator may be pushed or pulled without disassembly allowing for easier, faster application.

Product ID	Part Number	Product	MOQ	Order Unit	MSU	SU
7000045516	36865	3M™ Dirt Trap Protection Material Applicators, Floor Applicator, 711 mm, 36865

3M™ Self-Stick Liquid Protection Fabric

3M™ Self-Stick Liquid Protection Fabric is ideal for a wide range of temporary surface protection in industrial settings. Its liquid-proof layer protects work surfaces from water, oils, solvents and more. Its nonwoven surface traps dirt, dust and debris and prevents them from spreading through the facility. Its adhesive backing keeps it securely in place and removes without residue.

- 3M™ Self-Stick Liquid Protection Fabric must not be used in any areas where explosive concentrations of ignitable materials could be present, as static discharge may occur. These include areas identified as ATEX Zones 0, 1, 2 and 20, 21, 22
- Specially engineered surface protection material for industrial, marine and automotive applications
- Temporarily protects surfaces from the damaging effects of liquids, oils and solvents while also trapping dirt

Tapes

Scotch® Performance Masking Tape 233+

Scotch® Performance Masking Tape 233+, is a highly-conformable tape that provides the best adhesive transfer resistance, hugs curves, contours and provides outstanding paint lines. Goes on quickly and easily, sticks at a touch and stays put. Perfectly balanced to give outstanding masking results. Waterborne paint compatible.

- High performance masking tape
- Highly conformable, provides outstanding paint lines; resists bleed-through and adhesive transfer
- Sticks and stays when applied, no lifting or edge curl

3M™ Precision Masking Tape

3M™ Precision Masking Tape is excellent for critical edge paint performance, helping auto body painters produce sharp paint lines using solvent and waterborne paint systems. Its ultra thin paper backing helps produce very low paint edges, yet it's strong enough to pull through layers of color and clear coat. The tape is ideal for two-tone separation, bumper black out areas and back masking.

- Prevent paint running
- Ideal for critical edge masking applications such as two-tone separation, bumper black out areas and back masking with solvent and waterborne paints
- Semitransparent for better visibility

Focus

3M™ Soft Edge Foam Masking Tape PLUS

Eliminate rework of unwanted paint lines and save time with 3M™ Soft Edge Foam Masking Tape PLUS. Our tape is ideal for masking door apertures, bonnet or boot lid openings that need to be sealed during an automotive painting job. The off-set adhesive keeps adhesive away from the paint edge.

- Avoid hard paint lines in apertures and other vehicle areas
- Reduce painting time with less rework needed for unwanted paint lines
- Offset adhesive and tubular design to conform and seal opening

Product ID	Part Number	Product	MOQ	Order Unit	MSU	SU

Tapes

3M™ Soft Edge Foam Masking Tape

Mask door apertures, bonnet or boot lid openings and other vehicle parts with 3M™ Soft Edge Foam Masking Tape. Our tape is perfect for the sealing part of a painting operation and saves you time on reworking due to unwanted tape lines.

- Avoid hard paint lines in aperture areas and seal them with confidence
- Eliminate rework due to unwanted tape lines, saving time and money
- Get a specially designed polyurethane foam structure

3M™ Smooth Transition Tape

Our 3M™ Smooth Transition Tape is a fast, simple way to virtually eliminate rework caused by hard paint lines. It is designed specifically to create smooth transitions to existing finishes: a raised center ridge contains adhesive, while the paint feathers in naturally beneath the edges for virtually invisible paint lines.

- Eliminate hard paint lines
- Apply and remove easily with speed and ease
- Leaves a smooth paint transition - no hard edge line for collision repair painters

Product ID	Part Number	Product	MOQ	Order Unit	MSU	SU
7000000459	06800	3M™ Smooth Transition Tape, White, 6.35 mm x 9 m, 06800				Roll

3M™ Perforated Trim Masking Tape

3M™ Perforated Trim Masking Tape features a rigid band along one edge that slips gently behind moldings, lifting them slightly from the body. This tape allows paint to flow beneath the moldings while masking their exteriors for a professional, finished paint job without removing or replacing the moldings or rework for paint lines. Perforations allow you to tear the tape by hand, saving time.

- Perforations allow for hand tearing without tools
- Hard band at the tape edge slightly lifts moldings from the body for concealed paint edges
- Speeds paint time – no need to remove or clean auto body moldings

Product ID	Part Number	Product	MOQ	Order Unit	MSU	SU

Tapes

Scotch® Fine Line Striping Tape

Save time and create precise fine lines when auto body paint striping, using Scotch® Fine Line Striping Tape. Our 1in wide tape is pre-slit and easy to use. Simply apply our specially engineered tape, and pull out up to eight 1/6in wide strips to expose paintable areas.

- Create fine lines quickly and easily, without bleed
- Use for excellent multicolour striping, thanks to solvent and waterborne coating resistance
- Even adhesion allows taping over fresh basecoats sooner with less chance of imprinting

Product ID	Part Number	Product	MOQ	Order Unit	MSU	SU
7000029139	06314	Scotch® Fine Line Striping Tape, 8 Pull Outs, 25.4 mm x 13.9 m, 06314		Roll		

3M™ Welding and Spark Deflection Paper

3M™ Welding and Spark Deflection Paper helps protect vertical surfaces from damage caused by welding spatter and grinding sparks. Our flame-retardant paper comes with adhesive backing for easy application to vertical surfaces. The adhesive backing allows for easy repositioning of the spark deflection paper as needs change at a work site.

- Deflection paper helps protect vertical surfaces from sparks and spatter
- Recommended wherever welding or grinding tasks are performed
- Adhesive backing allows for simple installation

Tapes

Vinyl Tapes

3M™ Vinyl Tape 471+

3M™ Vinyl Tape 471+ is for accurate masking alignment with simple or complex patterns. Our tape provides clean removal without adhesive residue, even after a 30 minute bake cycle at 121 °C. It resists lifting from compound surfaces, contours, depressions and angles for precision paint results.

- Provides clean removal without adhesive residue after a 30 minute bake cycle at 121 °C. Even no ghosting effect
- Flexible and conformable tape creates fine paint lines for striping, colour separation and complex designs
- Semi-translucent backing allows for accurate alignment with simple and complex patterns

Respiratory Protection

3M™ Particulate Filters

3M™ Particulate Filters provide protection against a wide range of dusts, mist and other particles. 3M particulate filters offer low breathing resistance and good balance with a slim, swept back profile, designed to optimise your field of vision when wearing the respirator. Selected filters in the range can be used in conjunction with a 3M™ 501 filter retainer and a 3M™ Gas & Vapour Filter to provide combined gas, vapour and particulate protection.

- Protects against a range of dusts, mists and particulates
- Options for P1, P2 or P3 protection
- Features the 3M Bayonet style connection

Hearing Protection

Earplugs

3M™ Earplugs 1100 Series

The 3M™ 1100 Earplugs are disposable foam earplugs designed for insertion into the ear canal to help reduce exposure to hazardous levels of noise up to 37 dB.

- Reduces noise levels up to 37 dB
- Tapered design provides a good fit on a wide range of ear canal sizes
- Soft hypoallergenic foam softens with body temperature once inserted for comfortable extended wear

Product ID	Part Number	Product	MOQ	Order Unit	MSU	SU

Welding Helmets

3M™ Speedglas™ Welding Helmets 9100 Series

3M™ Speedglas™ 9100 Series Welding Helmets protect workers from radiation, heat and sparks, while providing a precise view of your work.

- Available Auto Darkening Lenses with seven variable dark shades (5, 8 and 9-13) for most types of arc welding
- Available in multiple models with various viewing area sizes
- Available with or without side windows

Product ID	Part Number	Product	MOQ	Order Unit	MSU	SU
7100166722	501826	3M™ Speedglas™ Welding Helmets 9100 Series, with Side Windows, with Welding Filter 9100XXi, 501826		Each		

3M™ Speedglas™ Welding Helmets 100 Series

3M™ Speedglas™ 100 Series Welding Helmet helps protect welders from flying sparks and airborne debris, and the Auto-Darkening Lens helps keep the eyes safe from the intense light of MIG, TIG, and stick welding while offering an accurate view of the workspace, before during and after the weld. With an optional hard-hat adapter, this helmet is a great choice for welders starting off their careers, tradesmen, and DIYers.

- Welding helmet with optional safety helmet adapter
- Great choice for welders starting off their careers, tradesmen, and DIYers
- Auto-Darkening Lens with five adjustable dark shades 8–12 (not applicable to 3M Speedglas 100 Passive Welding Helmet)

3M Standard Operating Procedures (SOPs) Process for Success

For truly spectacular results coming out of your body and paint shop, discover the best practices, processes and procedures to bring into it. From metal and plastic repair, to sanding, paint finishing and car clean-up, 3M has the products and repair processes for you.

In our SOPs you will find step-by-step procedures from start to finish, including body, plastic and panel repair and restoration, how to mask a vehicle, sand primer, feather prime block, preparing bumpers and e-coat panels and mixing and spraying using disposable paint cups. These SOPs are recommended for helping ensure you create the highest quality repairs for paint application, and finishing a great job to your customers satisfaction.

3M Standard Operating Procedures Recommended Net Sanding Process CUBITRON II

PERSONAL SAFETY

- 1. Sanding down the body filler
- 2. Fine sanding of the filler
- 3. Sanding filler
- 4. Preparing the surface
- 5. Fine sanding of the surface
- 6. The removal of the surface
- 7. Preparing of the surface
- 8. Large area sanding
- 9. Blending into adjacent parts

3M™ Cubitron™ II Net Abrasive Disc 120+ - 150+
To prolong the life of the backup pad when sanding with an abrasive disc (150 mesh) it is recommended that Festool Automotive Systems Protection Pad is used (PN 30089). Protection Pad (PTF 0550). Festool Automotive Systems electric sander ETS EC 150/S or Festool Automotive Systems pneumatic sander LEX 3 150/S or 150/7.

3M™ Cubitron™ II Net Abrasive Disc 220+ - 240+
Refine previous sanding scratches which reduces the possibility of solvents from the body filler penetrating into the OEM paint layer. If this happens it can lead to surface swelling around the repair.

3M™ Cubitron™ II Net Abrasive Disc 150+ - 240+
Initial shaping of the body filler.
Ensure that you use dust extraction.

3M™ Grippy Sanding Cloth, P800 - P1000.
Note: This product is recommended for maximum process safety.

3M™ Cubitron™ II Net Abrasive Disc 320+
It is advisable to work with a soft interface pad when sanding curved areas.
Tip: The choice of the fine grit has to be adjusted to the solvent sensitivity of the original paint. The finer the sanding before primer application.

3M Hookit™ Hand Block and 3M Abrasives 320+ - 400+
Highlight the texture and structure of the primer using dry guide coat.
For best result and the most efficient process always use dust extraction.

3M™ Grippy Sanding Cloth, P800 - P1000.
Note: This product is recommended for maximum process safety.

Identify and highlight sanding scratches through the application of dry guide coat.

Eccentric sanding with 3M Abrasives 400+ - P600.
For critical colours use a 3M™ Hookit™ Flexible Foam Disc P800 as a last sanding step after 400+.
Dusting of the surface with 3M™ Scotch-Brite™ Abrasives Discs.
Tip: It is advisable to work with a soft interface pad sanding curved areas.

3M™ Hookit™ Flexible Foam Disc P800 - P1000
Prepare adjacent areas of the OEM clearcoat.
Note: This product is recommended for maximum process safety.
